
QOMO 2010 (PC) Release Notes

Software Name: QClick Audience Response System

Release Date: 2010-04-17

Version: QClick 5.0.3.3

Support: support@qomo.com

Languages: English

New Features: (compared with Version 5.0.3.1)

The Vote mode requires as follows:

1. The instructor keypad begins the quiz, questions and options would be sent to the student keypad at the same time.
2. Student keypad is unable to toggle the typing .(It is fixed)
3. During the session, the student keypad can only edit and send the answer with no access to exit the session.
4. Press the option would send the answer directly which is similar to QRF300.
5. Once the session began the Histogram Window would appear.
6. Under the Vote mode, the student keypad would automatically log in as soon as the power is on, and the student keypad would also get the questions automatically.
7. Partial strings have been modified.

Fixed:

1. In European time create Grade Period, saving report can work.
2. File "QClick Presentation JZ.ppt" can be converted and used.
3. Under Edit Class window, the rename text box is too small to make the inputs clear.
4. Take the multiple mode questions to test under Vote mode, after saving the data and refer to the Voting Result report, software can work.
5. After using the instructor keypad upload a session and begin to start a new quiz, select the Class tab, software can work.

Note:

- Please unplug all USB devices before the installation.
- Users that have installed the old version of QClick software should pay attention to the database management. Uninstalled the previous QClick and installed the new version. If the OClick is installed in the Disk C, the QOMO file should delete first and installed the new one.
- The version is only used in the delivery of QRF900.
