## QOMO QD3300 DOCUMENT CAMERA IMPROVED FEATURES

### *Three Enhancements Give QD3300 Even More Value*

WIXOM, MICHIGAN (November 2011)—QOMO HiteVision's QD3300 full-size desktop Document Camera has just been improved! The QD3300, QOMO's most cost-effective Document Camera, has always provided an exceptional value and has been very popular in K-12 classrooms. The Document Camera's advanced and useful features are what make it a popular buy, including its sharp imaging, easy switching capabilities between video sources, and included video capture software with USB hook up.

Now, the QD3300 provides even more value to the customer, with three improved features. Now explore even closer, with **12X Optical Zoom**, over double its previous zoom of 5X; compatible with two new VGA output resolutions, **WXGA and 720p**; and from 32, it can now store **128 photos** in internal memory.

*“A high Performance-to-Cost ratio is important to our customers,” said Brandon Hong, Director of Product Development at QOMO HiteVision, “We work hard to achieve that by consistently developing advanced products at value pricing.”*

“A high Performance-to-Cost ratio is important to our customers,” said Brandon Hong, Director of Product Development at QOMO HiteVision, “We work hard to achieve that by consistently developing advanced products at value pricing.”

QOMO HiteVision believes that a quality product is improved not only by its features, but also by how easy it is to use. Like the rest of the QOMO product line, the QD3300 is easy to set up and learn.

Visit [www.QOMO.com](http://www.QOMO.com) for more information on the improvements to the QD3300 Document Camera and other QOMO products. QOMO is a global manufacturer and distributor of presentation technology products for the educational and corporate markets, with global headquarters in Wixom, Michigan.
