

QOMO HiteVision introduces the standard in High Resolution Digital Document Cameras.

Las Vegas, NV, June 18, 2008 – **QOMO HiteVision** introduces the new **QD6100SX** Digital Document Camera. The brand new **QOMO QD6100SX** uses a high resolution 2.0 megapixel **CMOS** (*Complementary metal-oxide-semiconductor*) imaging engine that gives it outstanding image quality, phenomenal color reproduction and remarkable video performance. The **QD6100SX** features a professional grade 10X Optical Zoom Lens.

As with all **QOMO products**, **QD6100SX** was designed to be an integral component of the “**QOMO Interactive Classroom Solution**.” This is our corporate vision for designing and integrating all of our products, Document cameras, Whiteboards, Interactive tablets and Audience Response systems so that they can work together to create a powerful technology enabled classroom environment. To accomplish this, our engineers have designed the **QD6100SX** with a complete Multi-Media Switching system, Video Scaler and Projector Control. You can connect 2 MAC or PC computers (with audio), a DVD player, and a VCR directly to the **QD6100SX**, and you need only one VGA cable to connect to your display device or projector, saving hundreds of dollars in installation costs.

In addition, when the **QD6100SX** is connected to your computer via USB, the camera’s high resolution images can be incorporated into our Flow! Works software and in combination with our **QIT30** wireless tablet or our **QWB200** Whiteboard, the images can be annotated over and shared with students, thus making the **QD6100SX** a truly powerful interactive tool.

As we are all aware, there is a big disconnect between the printed page’s portrait format and the computer display’s landscape layout. In addition to the powerful 10X Optical Zoom, the **QOMO QD6100SX** features a motorized camera head that allows you to show a virtually any subject matter accurately and at high resolution.

- Professional grade 2.0 Megapixel CMOS imaging engine.
- SXGA, WXGA and XGA resolution.
- High quality precision lens with 10X Optical Zoom.
- Motorized camera head for scrolling of documents, photos, etc.
- Built in Multi-Media Switching and Control Functions.
- Internal Image Storage of up to 9 High Resolution Images.
- High speed USB 2.0 port for Video/Image capture on both PC.
- Powerful set of advanced image manipulation tools and special effects.
- 2 RGB inputs and 2 RGB outputs provide outstanding installation flexibility and convenience.
- Arm and Base LED lights are ECO-Friendly, cool to the touch and last up to 10 years.
- View transparencies, X-rays, photographic negatives, and microscope slides using the built in full sized LED light box.
- Wireless Remote Control.
- Two-year Parts & Labor warranty.

Presenters can use the **QD6100SX**’s powerful suite advanced image manipulation tools to engage and educate their audience and make learning fun. With the **QOMO QD6100SX**, you can capture and save video and/or still images via the USB connection for playback at a later time. No need to carry around memory cards, you can save directly to your hard drive! The unit is lightweight and folds for easy storage. All **QOMO** visual presenter/document cameras are backed by our industry leading warranty.

Because **QOMO** cares about the Earth, all **QOMO** document cameras are engineered to be environmentally conscientious. Many States and dozens of Countries consider fluorescent lamps to be hazardous material because

of their mercury content. This is one of the reasons that **QOMO** uses environmentally friendly, low power consumption and long lasting (25,000 hours) LED lighting in all of our document cameras. **QOMO** document cameras also meet the European Union's stringent requirements for the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS). This is an expensive way to build our products, but we consider it an important investment in our future.

About QOMO HiteVision:

QOMO HiteVision is a global force in the Audio/Visual industry. With board model range of document cameras, interactive whiteboards, wireless annotation tablets and student response systems **Qomo HiteVision** is positioned to be a major supplier in the US and world markets. Our Global center for sales, marketing, and service is located in Wixom, Michigan in the greater Detroit area.
