

## QOMO HiteVision introduces the latest evolution of their best selling Document Camera.

Las Vegas, NV, June 18, 2008 – **QOMO HiteVision** introduces the new **QD750** Digital Processing Document Camera. The challenge was to try and make our best selling **QD700** better. They said it was impossible! They were wrong! Our engineers took all of the advanced features of the best selling **QD700** and added an articulated, rotating camera head. You can move the camera in almost any direction or attitude. The **NEW QOMO QD750** is the only full-sized document camera available with this kind of flexibility. It shares the same precision lens with 22X Optical Zoom and the same 30 frames per second video performance as its sibling the **QD700**. The **QOMO QD750 just may be the next benchmark.**

The **QOMO QD750** was designed to be an integral component of the “**QOMO Interactive Classroom Solution.**” This is our corporate vision for designing and integrating all of our products so that they work together to create a powerful technology enabled classroom environment. To accomplish this, our engineers have designed the **QD750** with a complete Multi-Media Switching system, Video Scaler and Projector Control. You can connect 2 MAC or PC computers (with audio), a DVD player, and a VCR directly to the **QD750**, and you need only one VGA cable to connect to your display device or projector, saving hundreds of dollars in installation costs. Currently, there is a disconnect between the printed page’s portrait format and the computer display’s landscape layout. In addition to the powerful 22X Optical Zoom, the **QOMO QD750** has a fully articulated, rotating and motorized camera head that allows you to show a virtually any subject matter printed or 3D accurately and with tremendous flexibility.

- XGA Output for use with any type of high resolution display device.
- High quality precision lens with **Industry Leading 22X Optical Zoom** and 10X Digital Zoom.
- **Fully Articulated, Rotating and Motorized camera head** for scrolling of documents, photos, 3D objects, etc.
- Built in Multi-Media Switching and Control Functions.
- Internal Image Storage of up to 7 High Resolution Images.
- High speed USB 2.0 port for Video/Image capture on both PC and Mac.
- Powerful set of advanced image manipulation tools and special effects.
- 2 RGB inputs and 2 RGB outputs provide outstanding installation flexibility and convenience.
- Arm and Base LED lights are **ECO-Friendly**, cool to the touch and last up to 10 years.
- Choose between Static/Dynamic modes for high resolution images or high frame rate video.
- View transparencies, X-rays, photographic negatives, and microscope slides using the built in full sized LED light box.
- Wireless Remote Control
- Two-year Parts & Labor warranty

Presenters can use the advanced image manipulation tools to engage and educate their audience and make learning fun. With the **QOMO QD750**, you can capture and save video and/or still images via the USB connection for playback at a later time. No need to carry around memory cards... you can save directly to your hard drive! The unit is lightweight and folds for easy storage. All **QOMO** visual presenter/document cameras are backed by our industry leading warranty.

Because **QOMO** cares about the Earth, all **QOMO** document cameras are engineered to be environmentally conscientious. Many States and dozens of Countries consider fluorescent lamps to be hazardous material because of their mercury content. This is one of the reasons that **QOMO** uses environmentally friendly, low

power consumption and long lasting (25,000 hours) LED lighting in all of our document cameras. **QOMO** document cameras also meet the European Union's stringent requirements for the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS). This is an expensive way to build our products, but we consider it an important investment in our future.

**About QOMO HiteVision:**

**QOMO HiteVision** is a global force in the Audio/Visual industry. With board model range of document cameras, interactive whiteboards, wireless annotation tablets and student response systems **Qomo HiteVision** is positioned to be a major supplier in the US and world markets. Our Global center for sales, marketing, and service is located in Wixom, Michigan in the greater Detroit area.
