

QIT30 Setup Instructions for Windows XP

To ensure you have the latest version of the QIT30 driver, it is recommended that you download the software from our website, rather than installing from the included disk. If you do not have Internet access, use only the BLACK disc included in the box.

- Please visit <http://www.qomo.com>, click Support, click Software, and click **QIT30 Macro Key**.
- Download the zip file to your Desktop. Extract the files to a new folder on your Desktop. Call the new folder QIT30.
- In the QIT30 folder you just created, double click Setup.exe
- Follow the on screen instructions to install the software.
- At the end of installation it will ask you to reboot, please select Yes and click Finish.
- After your computer has been restarted, insert the USB dongle into an available USB port on your computer. Windows will indicate it has detected new hardware and will take a few moments to install the drivers.
- While Windows sets up the new device, insert the battery pack into the back of the tablet. Also install the battery for the pen. The positive (+) side of the pen battery should face the pen tip.
- Hold down the power button on the tablet for 3 seconds to turn it on.
- Press and release the button on the USB dongle. It will flash blue as it searches for the tablet.
- Press and release the red button the back of the tablet. If it successfully connects, the blue light on the dongle will stop blinking and turn off, while the display on the tablet will show an antenna (similar to a cell phone).
- You should now be able to control your computer with the tablet pen.

The following steps are optional, but offer additional functionality:

- To install Flow!Works software, insert the WHITE CD that was included in the QIT30 box into your computer. It will automatically run. Click Writing Tablet Software. This will install the Flow!Works software. **Do NOT install the Writing Tablet Driver.** You have already completed this step.
- You may also now configure the shortcut buttons at the top of the tablet writing surface. Please refer to the Macro Key Manager User Manual (included in the box), or visit <http://www.qomo.com>, Click Support, Click Manuals, and select QIT30 Macro Key Manager Manual.pdf
