**BEST SELLING QOMO PORTABLE DOC CAM NOW MORE ADVANCED**  
*QPC30 improved features mean even higher value at affordable price*

WIXOM, MICHIGAN (November 2011)—One of the market’s most affordable and lightweight Portable Document Cameras, QOMO HiteVision’s QPC30, has just added four advanced features, adding even more value to the high-end device. The QPC30, QOMO’s best selling Portable Document Camera, is known for its excellent image quality, color and camera head rotation, in a portable, extremely lightweight and affordable package. Its positive reputation is only improved with these enhancements.

The QPC30 has improved from the industry average of 5X, to **7X Optical Zoom**. The camera head, already highly maneuverable, now has an improved mechanism for **better mechanical control** and stability. Switch to a computer screen with the new **VGA pass-through**, and record live video with the included video software. The QPC30 is now compatible with **widescreen resolution**, a convenient feature for many users.

“What’s also great about these improved features,” says Gary Ward, Head of Operations at QOMO HiteVision, “is the

QPC30 remains the same low price that our customers love. This is another example of QOMO’s efforts to bring the highest performance and value to our customers.”

QOMO HiteVision’s goal is to continue to raise the quality of instructors’ presentations by providing cutting-edge technology that’s not only continuously improving, but also consistently easy to use and quick to learn.

*“The training was wonderful!” said teacher, Kim Iseral, of Boone County High School in Kentucky, on learning how to use QOMO products, “They are just an email away if we have questions and they had everyone in the building using the new technology after that training.”*
