

Mounting a BalanceBox[®] 400 to a brick wall

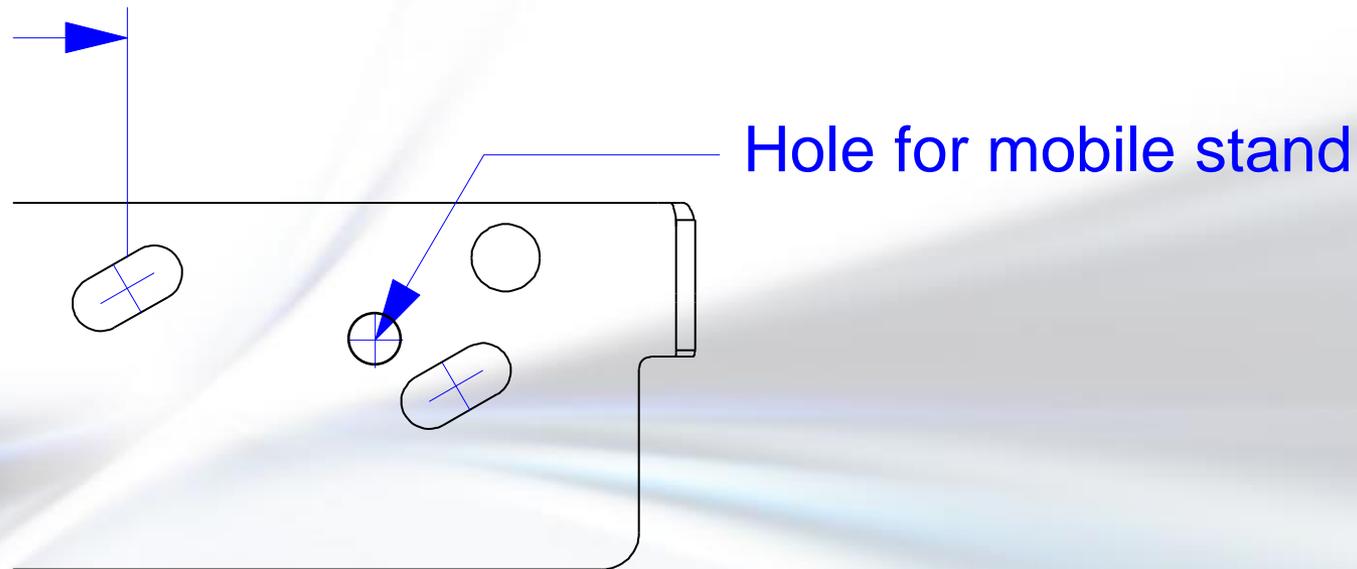

Unpack the BalanceBox[®] 400 and remove the Wall frame cover and its bag of screws. Slide the cover out at the top.

NOTE: the cover is NOT included with the BalanceBox[®] 400H

Mounting a BalanceBox[®] 400 to a brick wall

Mounting a BalanceBox[®] 400 to a brick wall

Use the indicated hole for mounting on the Mobile stand

Mounting a BalanceBox[®] 400 to a brick wall

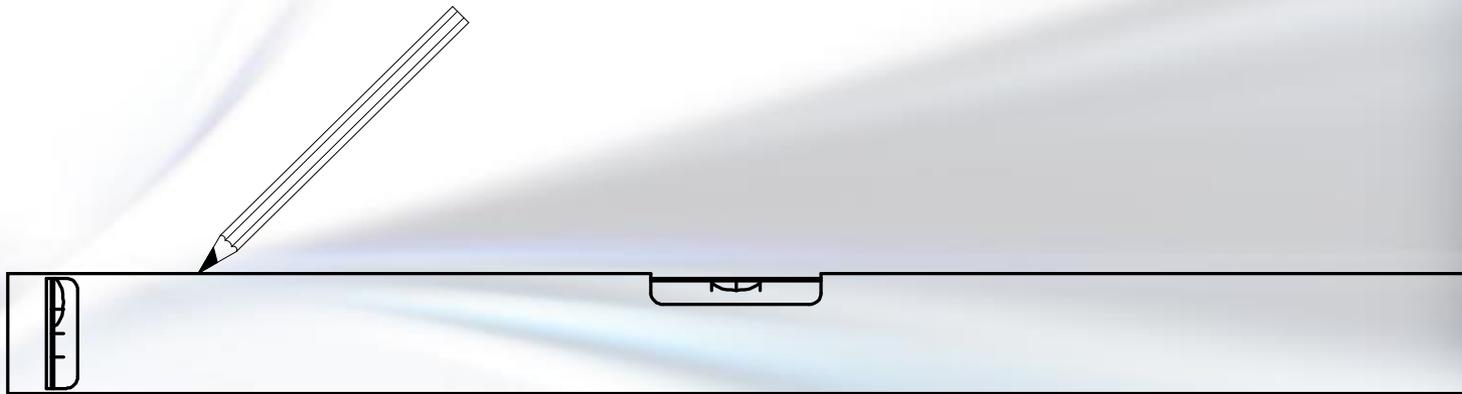

Measure the mounting height
from the floor.

And mark it

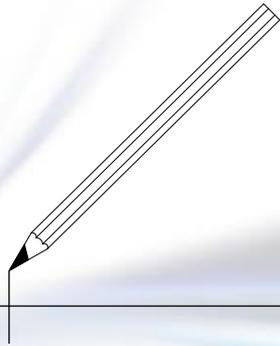

Mounting a BalanceBox[®] 400 to a brick wall

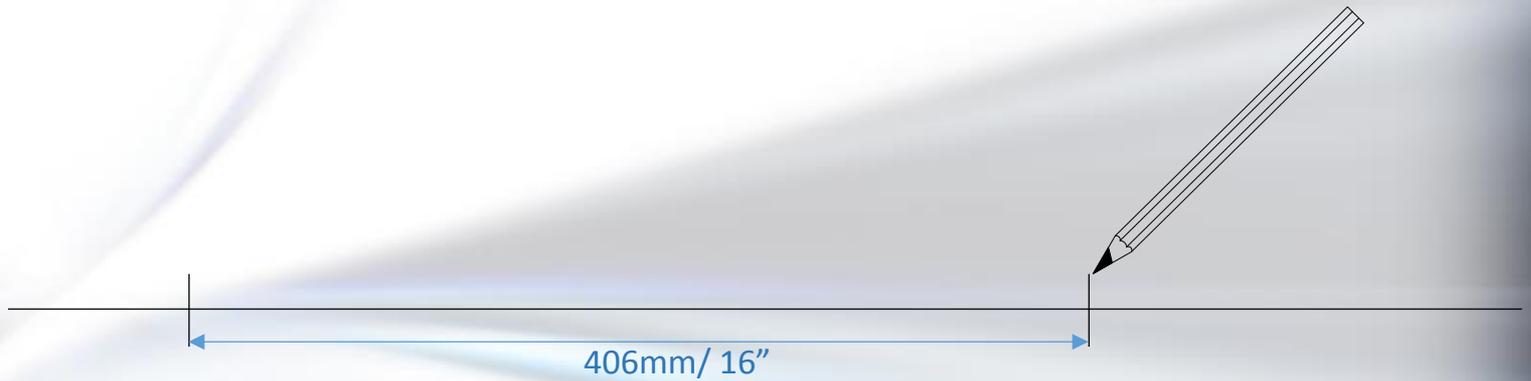

Using a level, mark the horizontal position of the other hole level to the first hole.
(distance 406mm / 16")

Mounting a BalanceBox[®] 400 to a brick wall

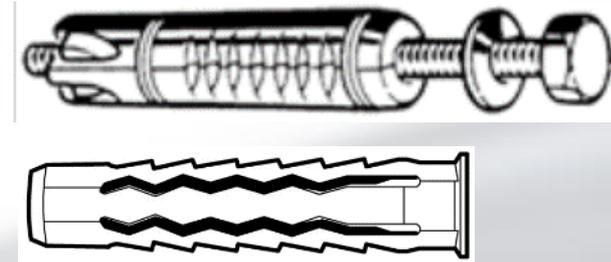

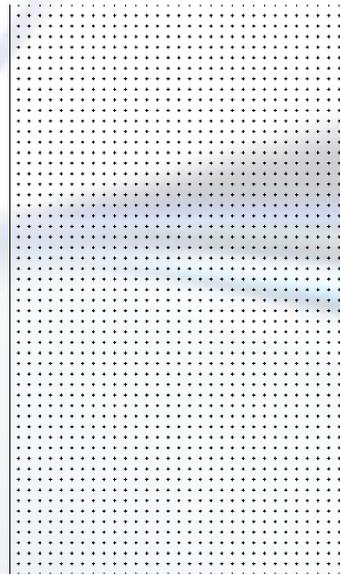

Mark the position of both holes
at a distance of 406mm /16"

Mounting a BalanceBox[®] 400 to a brick wall

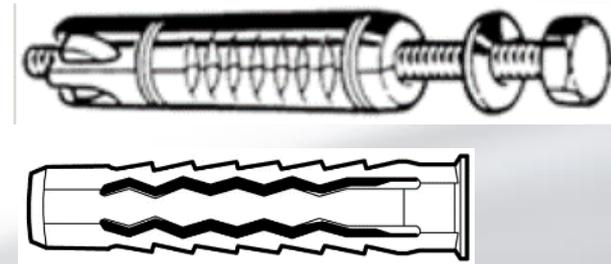

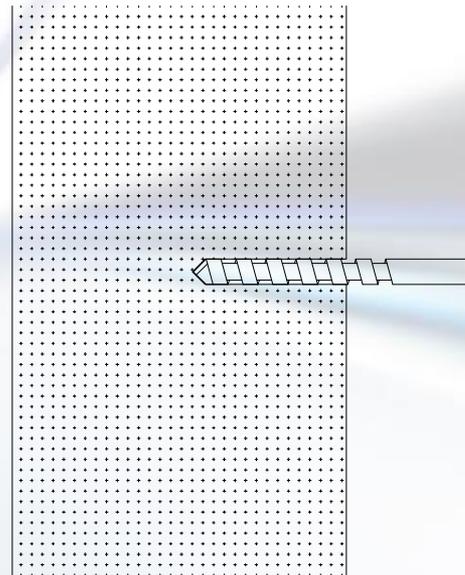

Mark the position of both holes
at a distance of 406mm / 16"

Mounting a BalanceBox[®] 400 to a brick wall

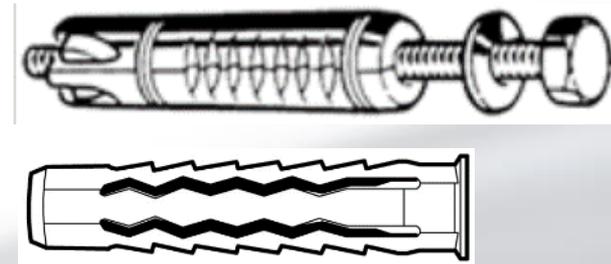

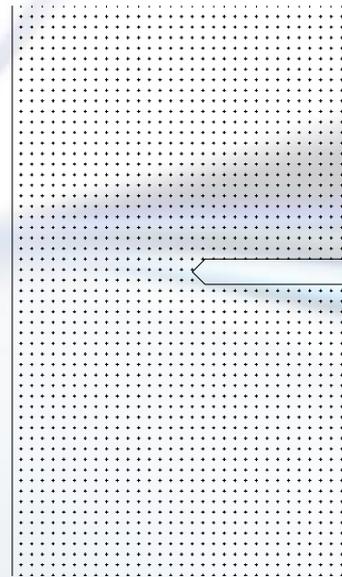

Drill the holes in the brick wall, use a 10 mm drill for plastic plugs and 8mm diameter screws, or appropriate drill for other type wall anchors.

Mounting a BalanceBox[®] 400 to a brick wall

Drill the holes in the brick wall, use a 10 mm drill for plastic plugs and 8mm diameter screws, or appropriate drill for other type wall anchors.

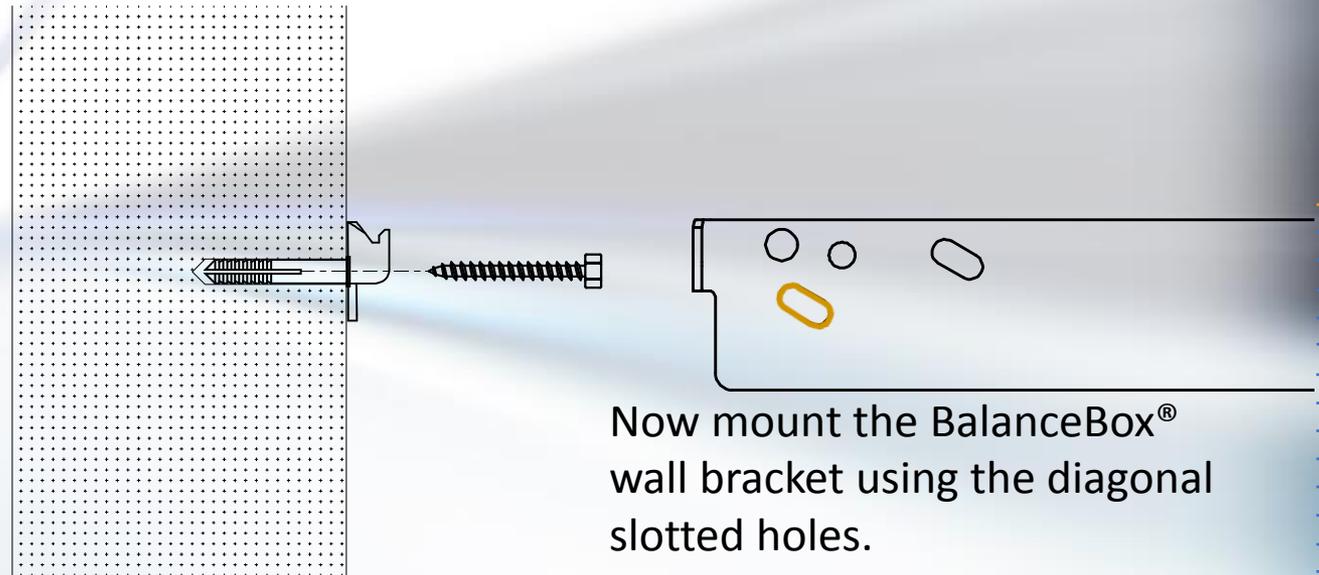

Mounting a BalanceBox[®] 400 to a brick wall

Insert the plug or wall anchor.
Mounting hardware used
depends on the type of wall.

Hardware is **not** included.

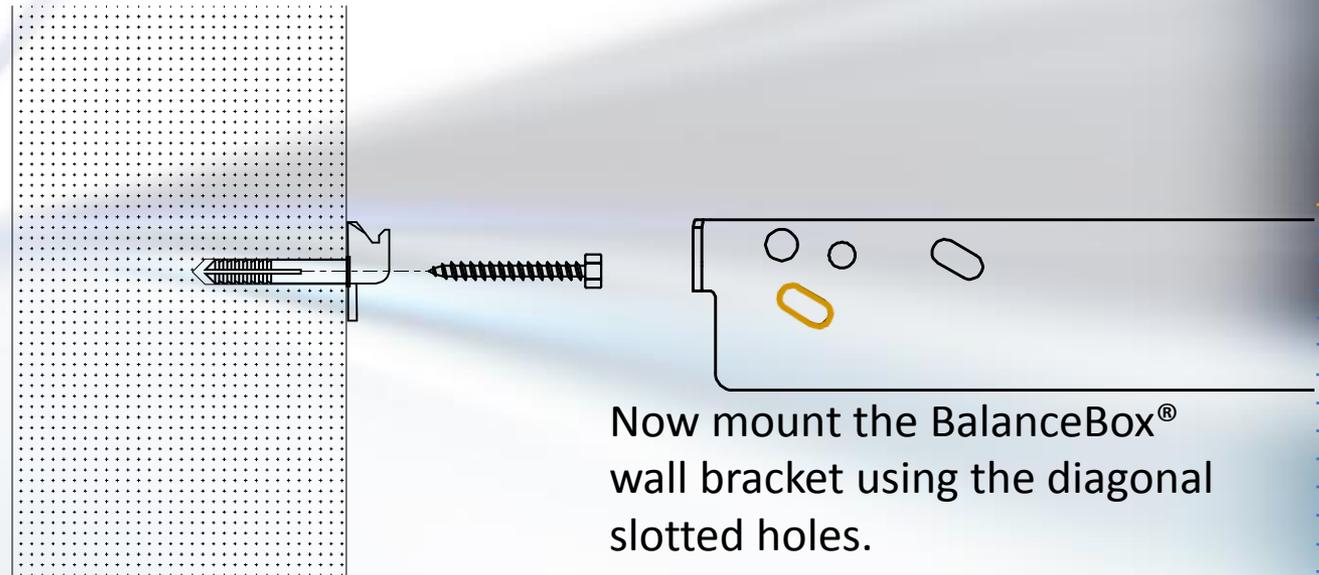

Mounting a BalanceBox[®] 400 to a brick wall

Now mount the BalanceBox[®] wall bracket using the diagonal slotted holes.

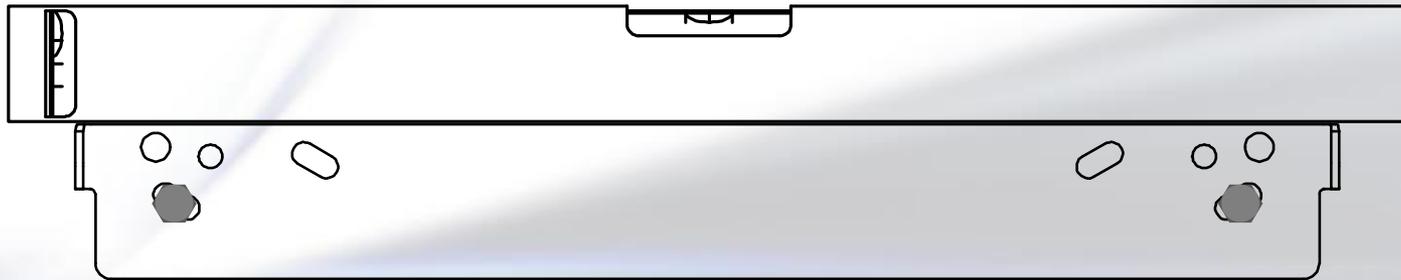

Do not tighten fully

Mounting a BalanceBox[®] 400 to a brick wall

Do not tighten fully

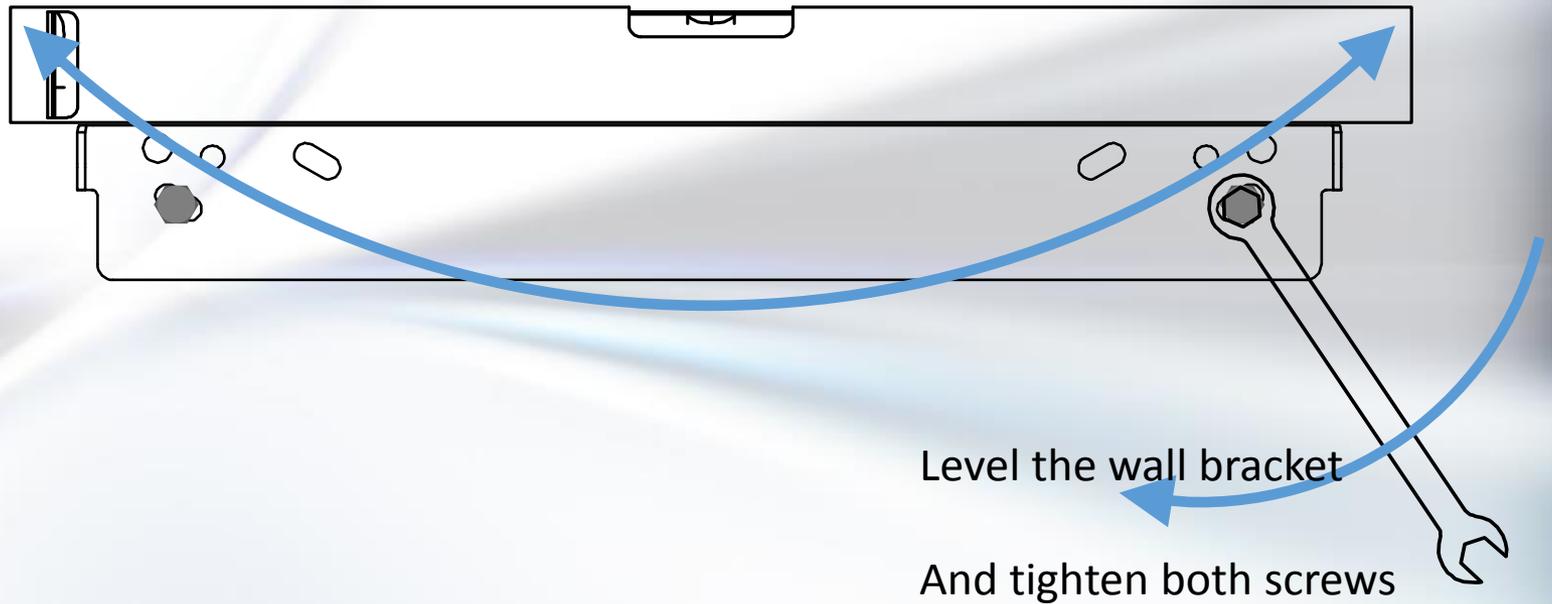

Mounting a BalanceBox[®] 400 to a brick wall

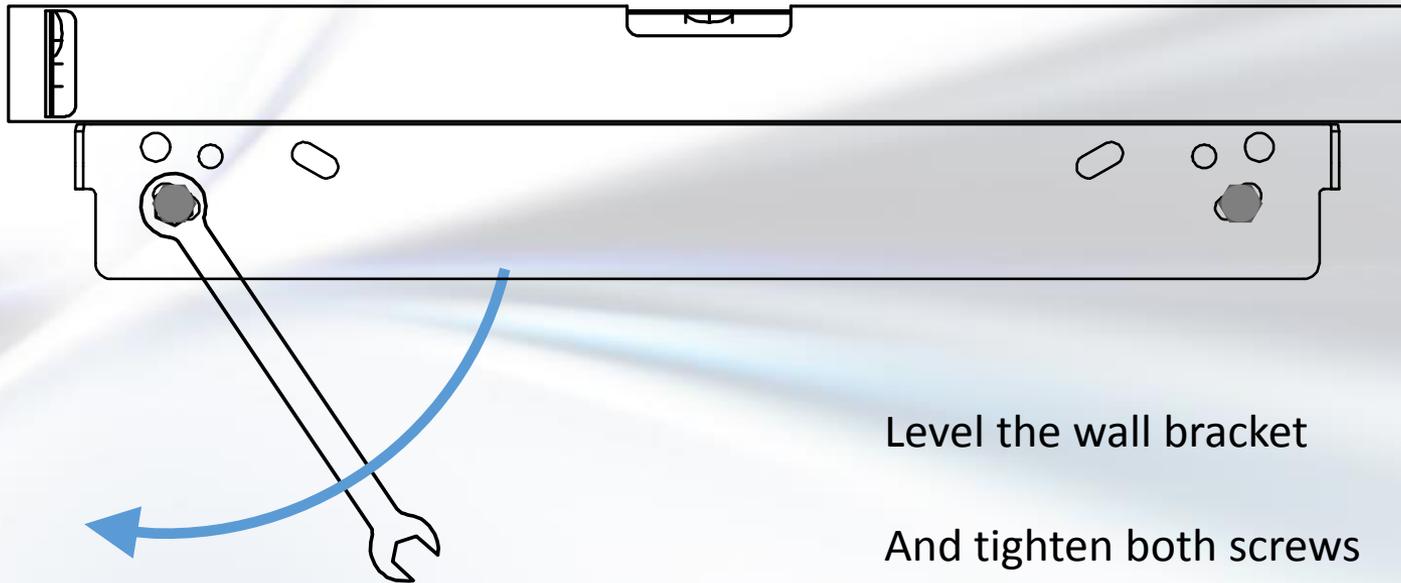

Level the wall bracket

And tighten both screws

Mounting a BalanceBox[®] 400 to a brick wall

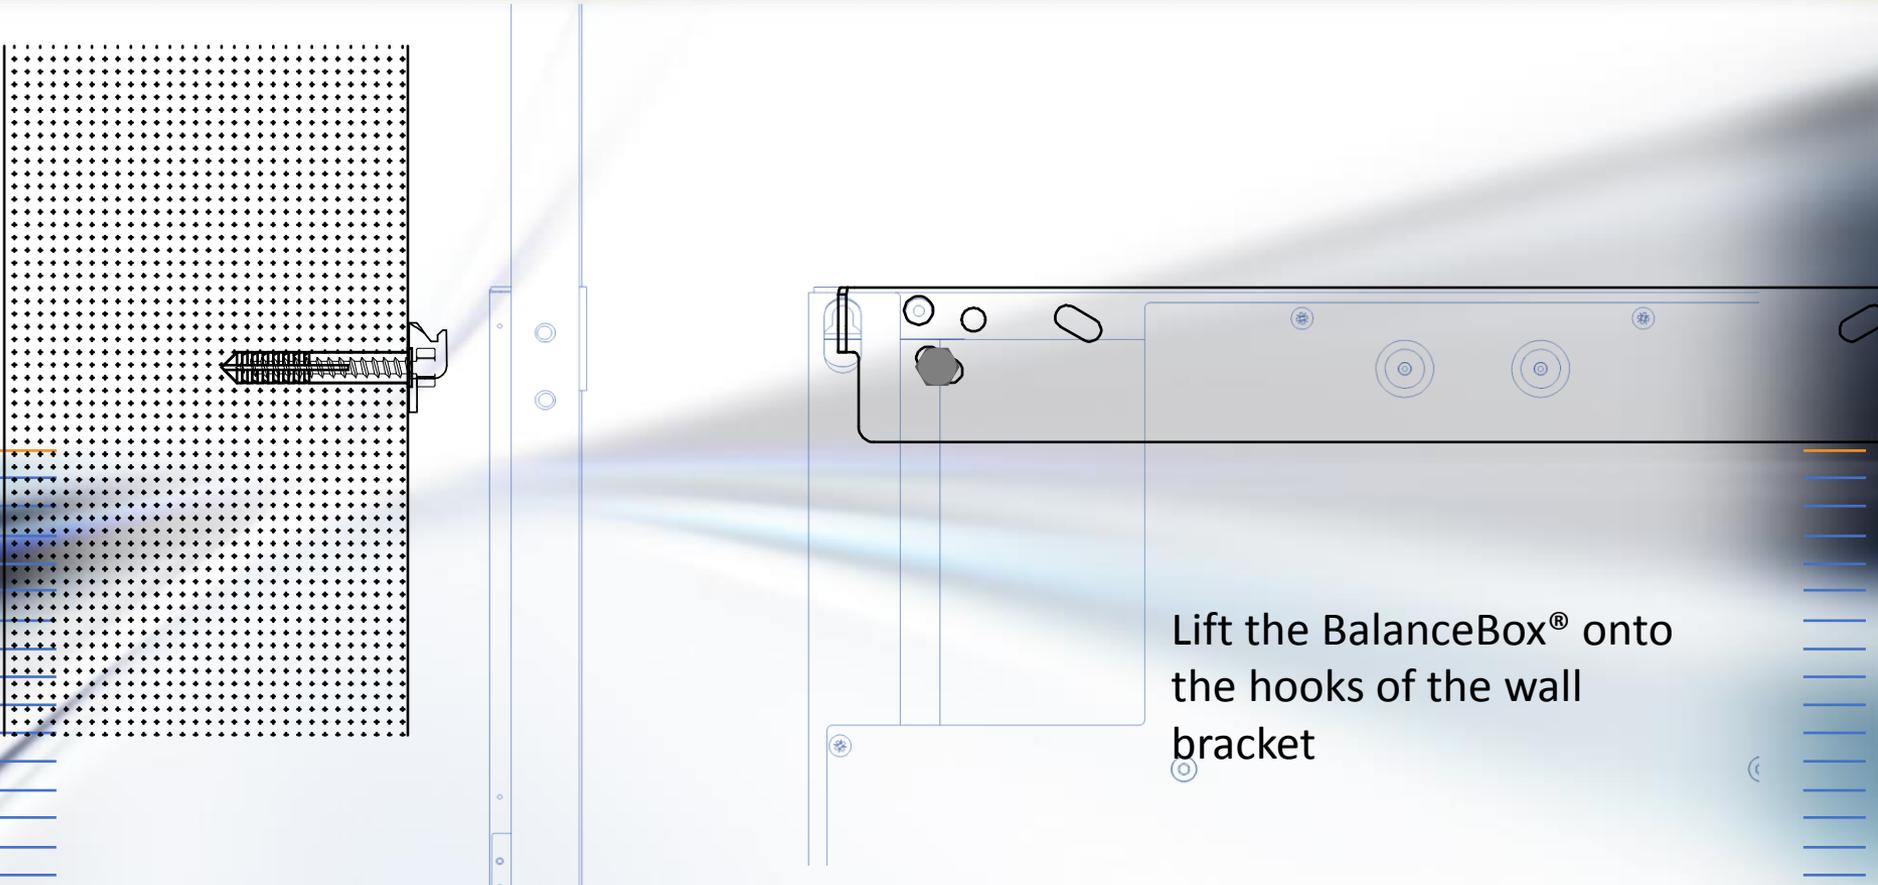

Mounting a BalanceBox[®] 400 to a brick wall

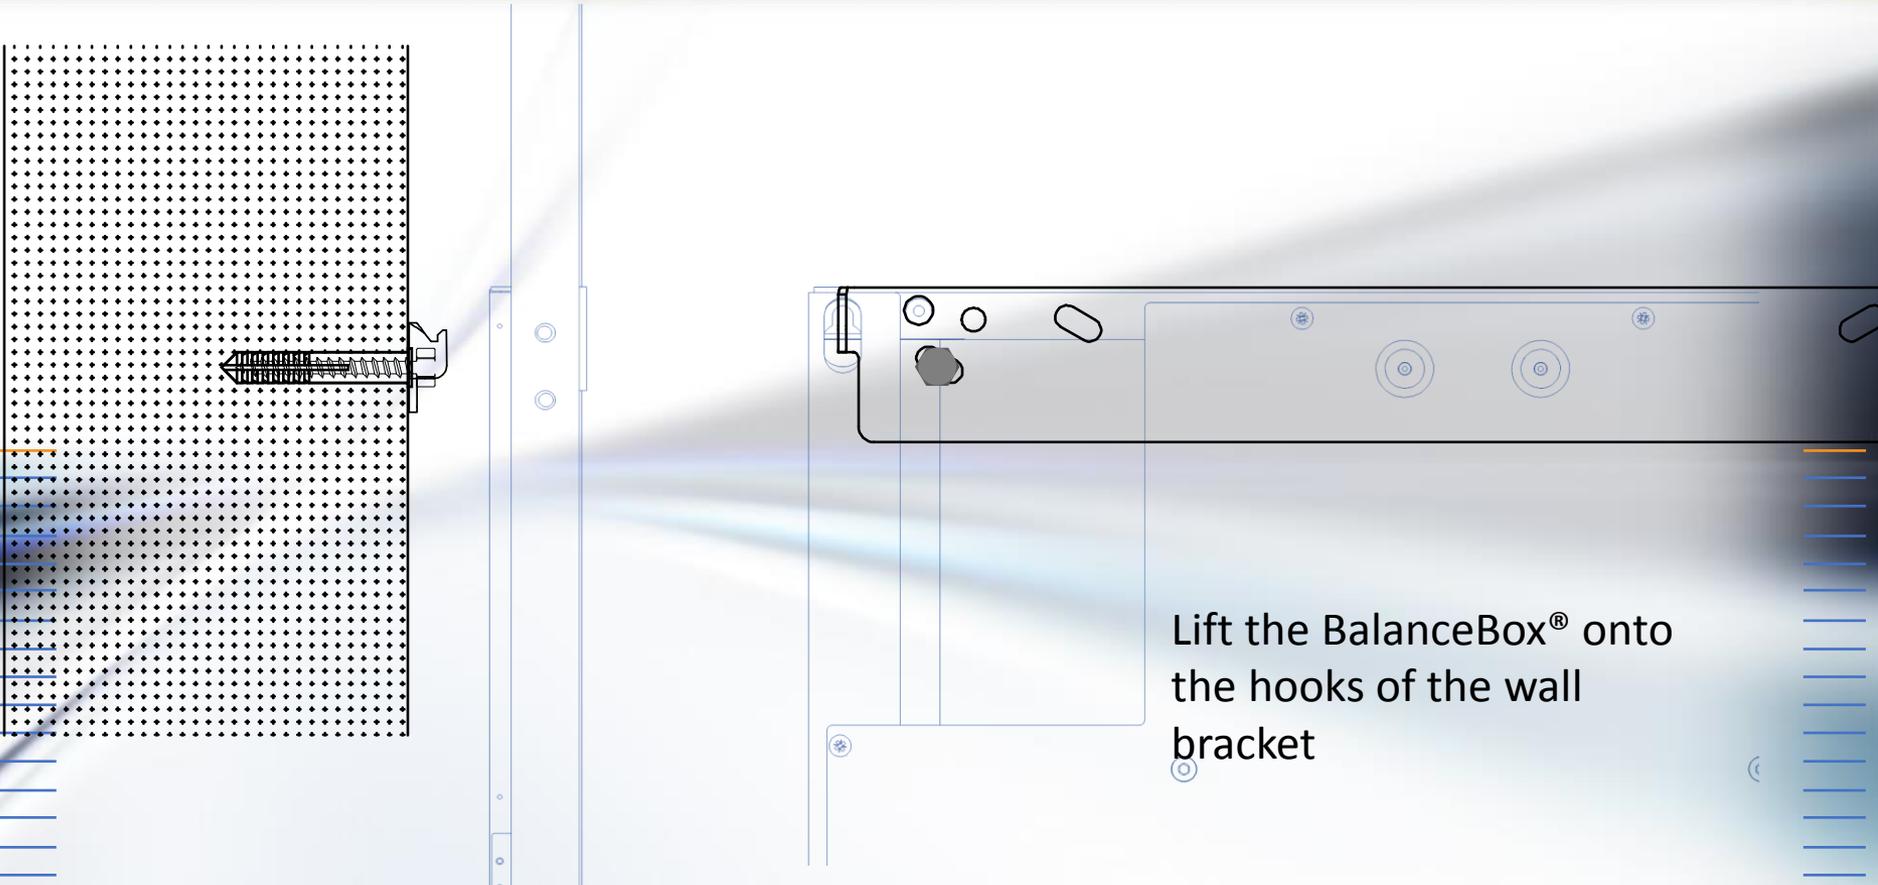

Level the wall bracket

And tighten both screws

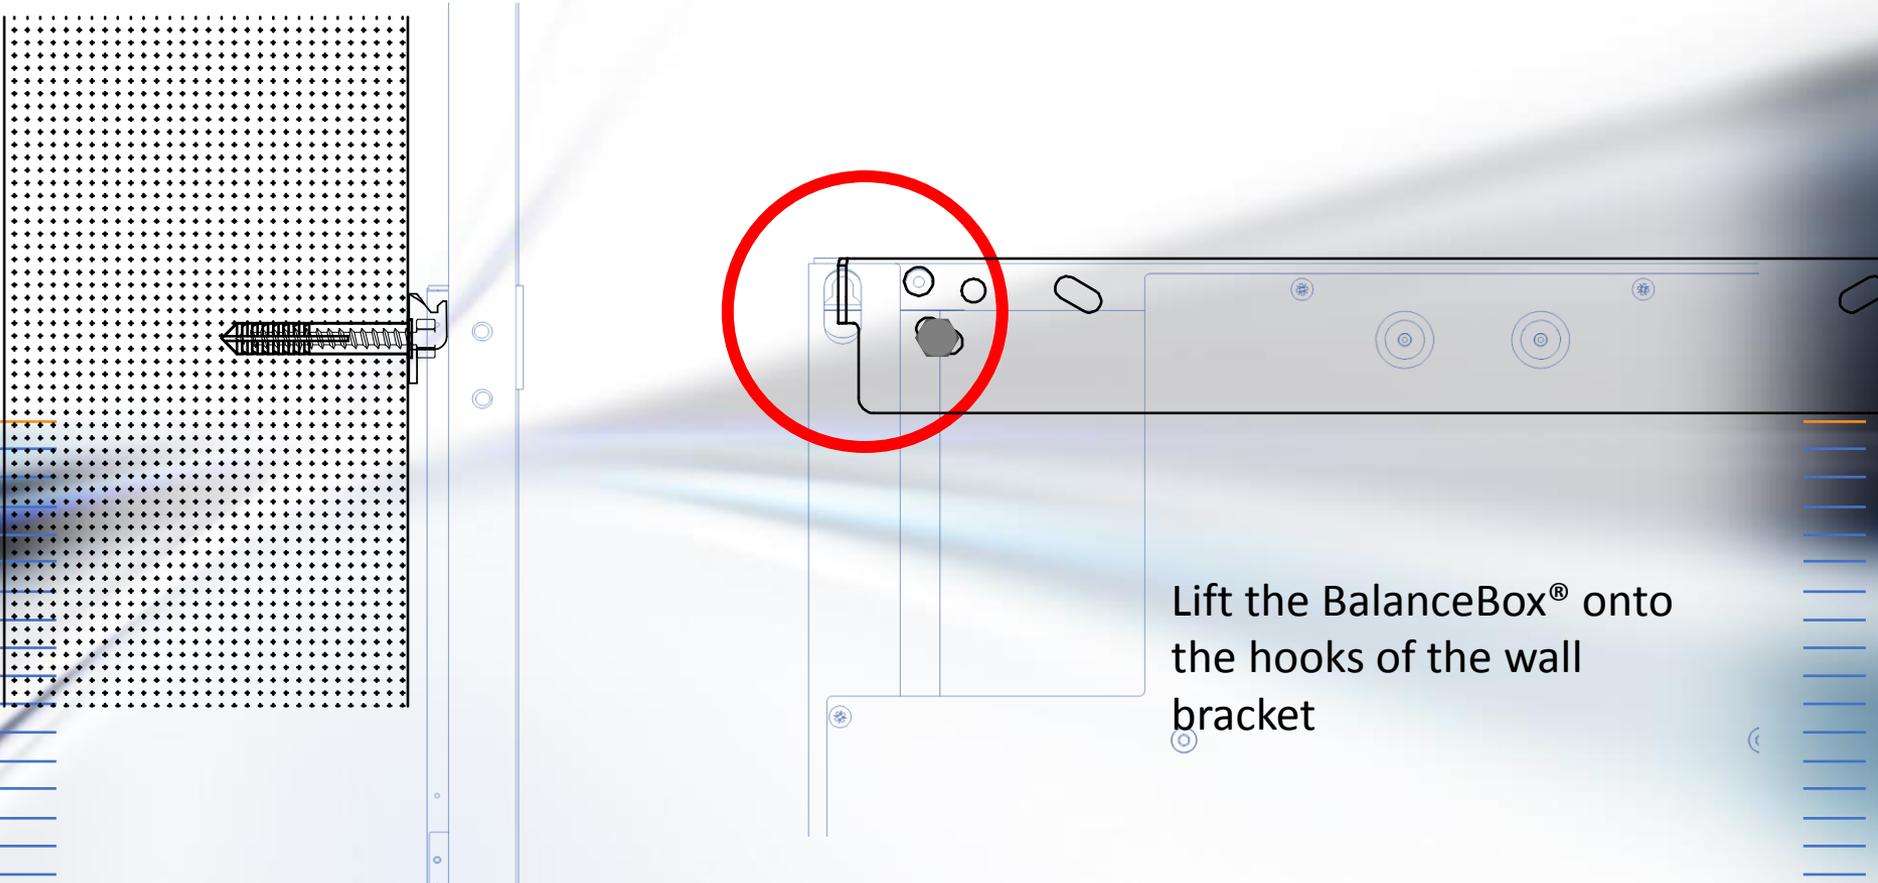

Mounting a BalanceBox[®] 400 to a brick wall

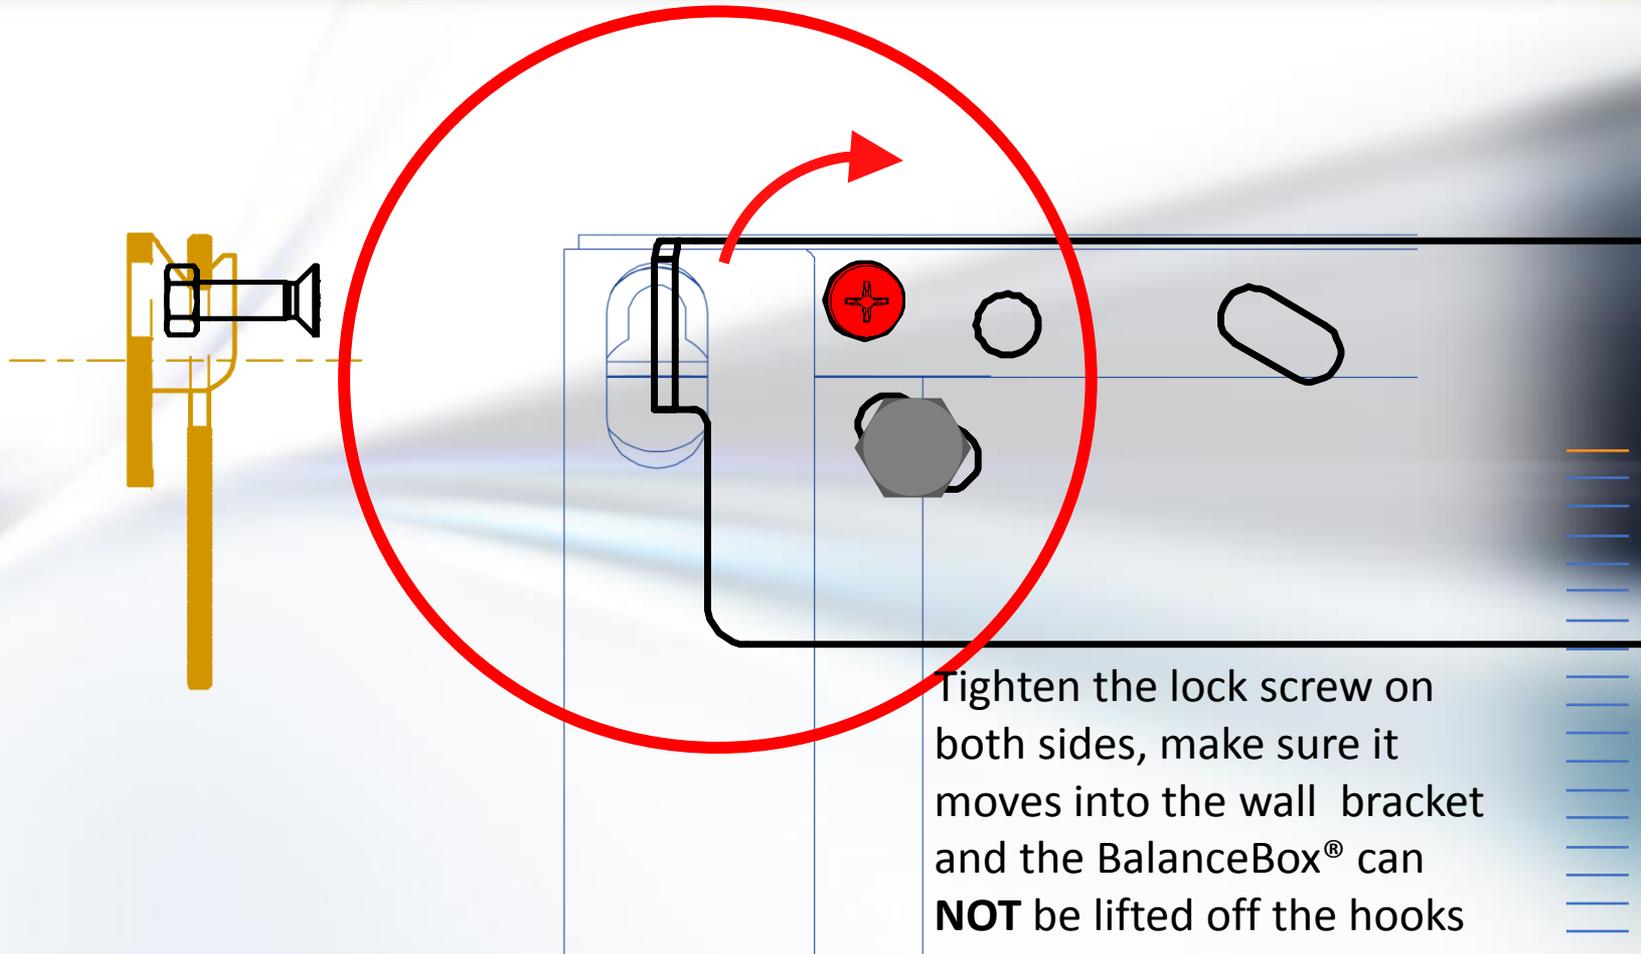

Mounting a BalanceBox[®] 400 to a brick wall

Tighten the lock screw on both sides, make sure it moves into the wall bracket and the BalanceBox[®] can **NOT** be lifted off the hooks and is secure on the wall.

Mounting a BalanceBox[®] 400 to a brick wall

Mounting a BalanceBox[®] 400 to a brick wall

Tighten the lock screw on both sides, make sure it moves into the wall bracket and the BalanceBox[®] can **NOT** be lifted off the hooks and is secure on the wall.

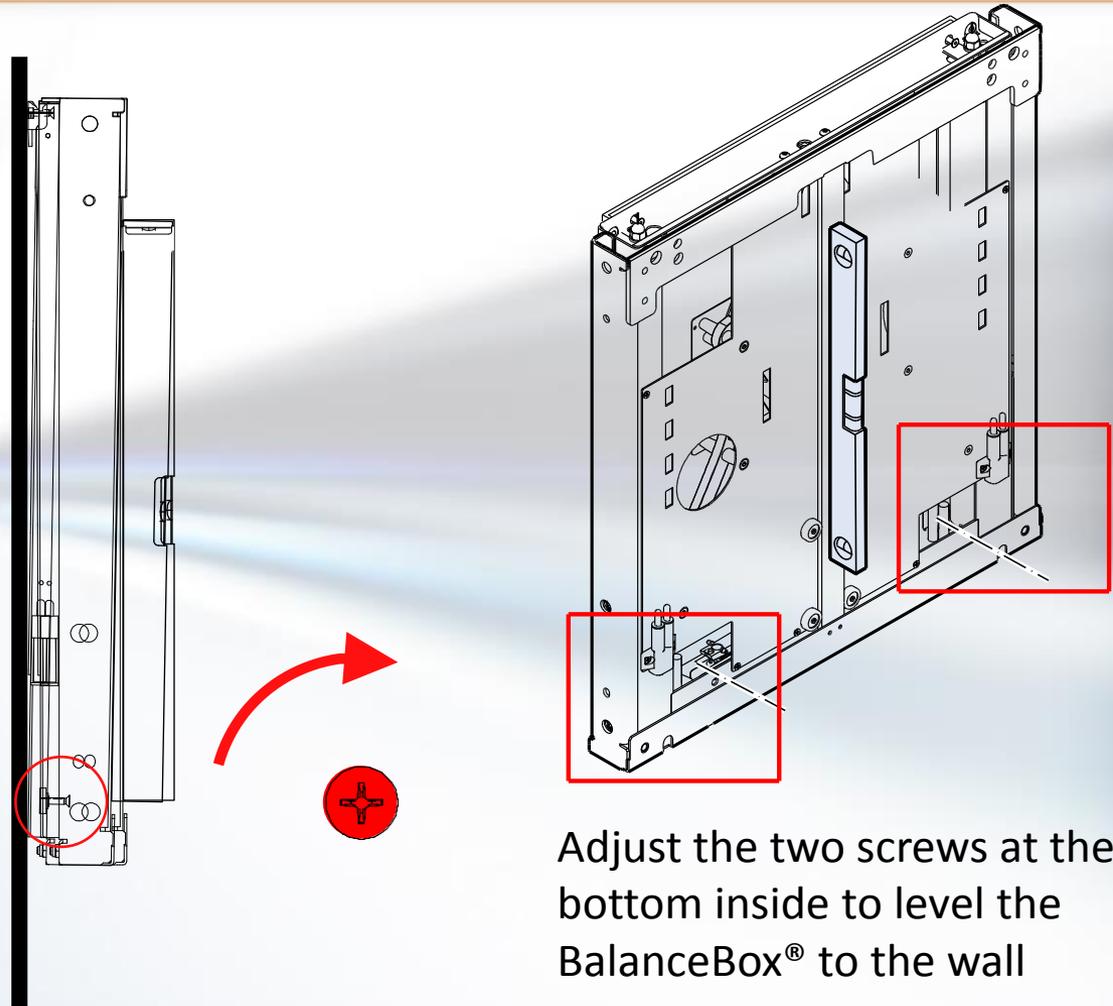

Mounting a BalanceBox[®] 400 to a brick wall

Always align the BalanceBox vertically!

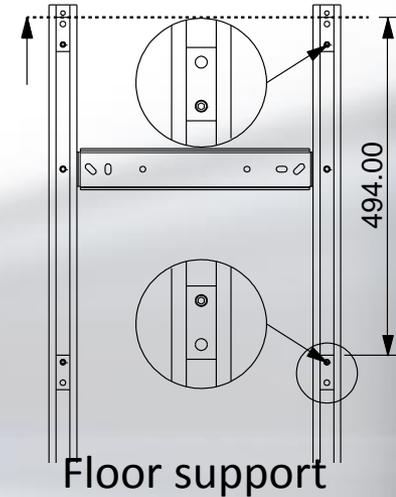

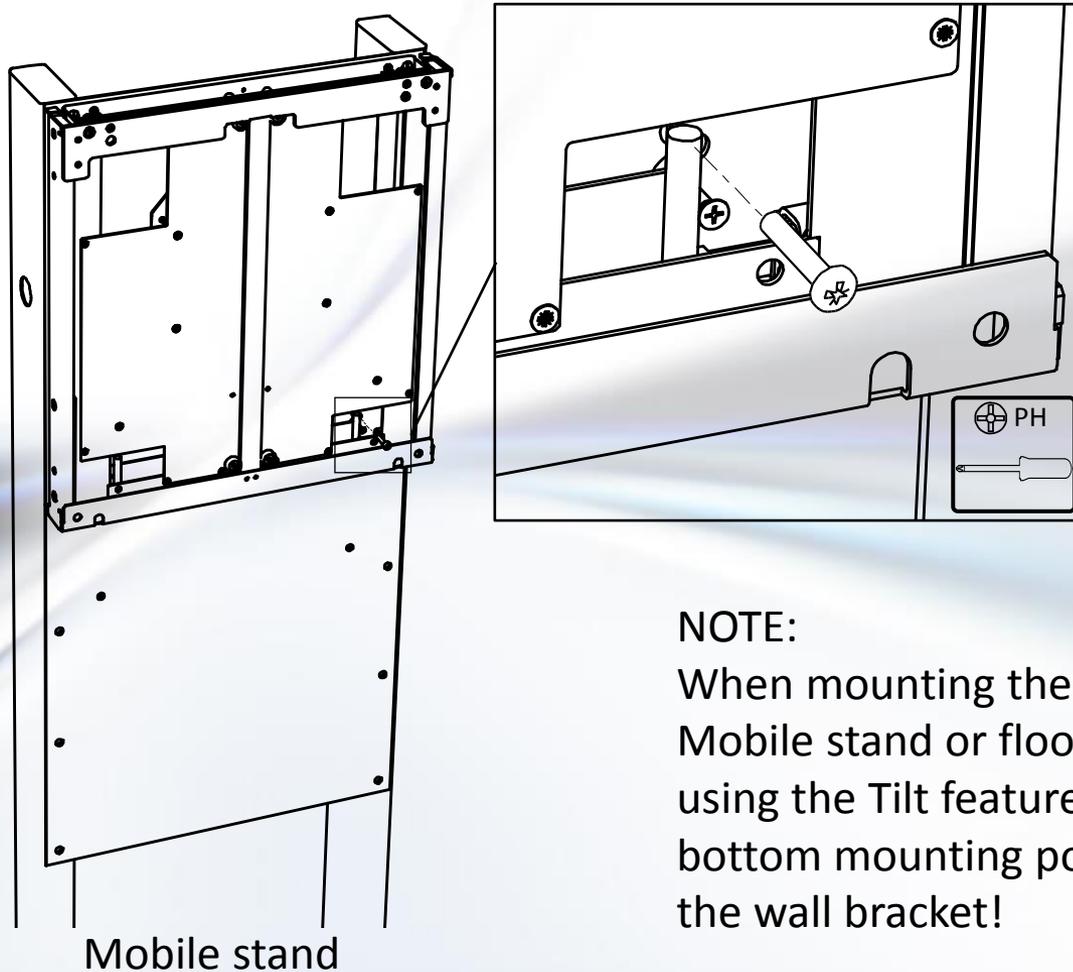

Avoid it crashing into the wall during use and noise from misalignment.

Mounting a BalanceBox[®] 400 to a brick wall

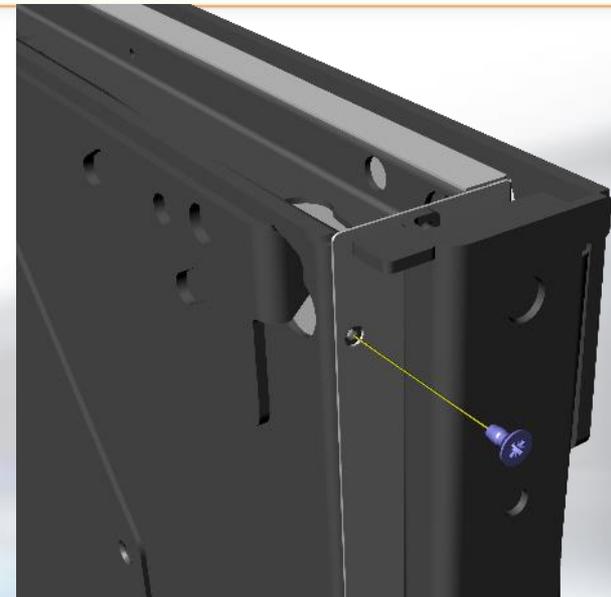

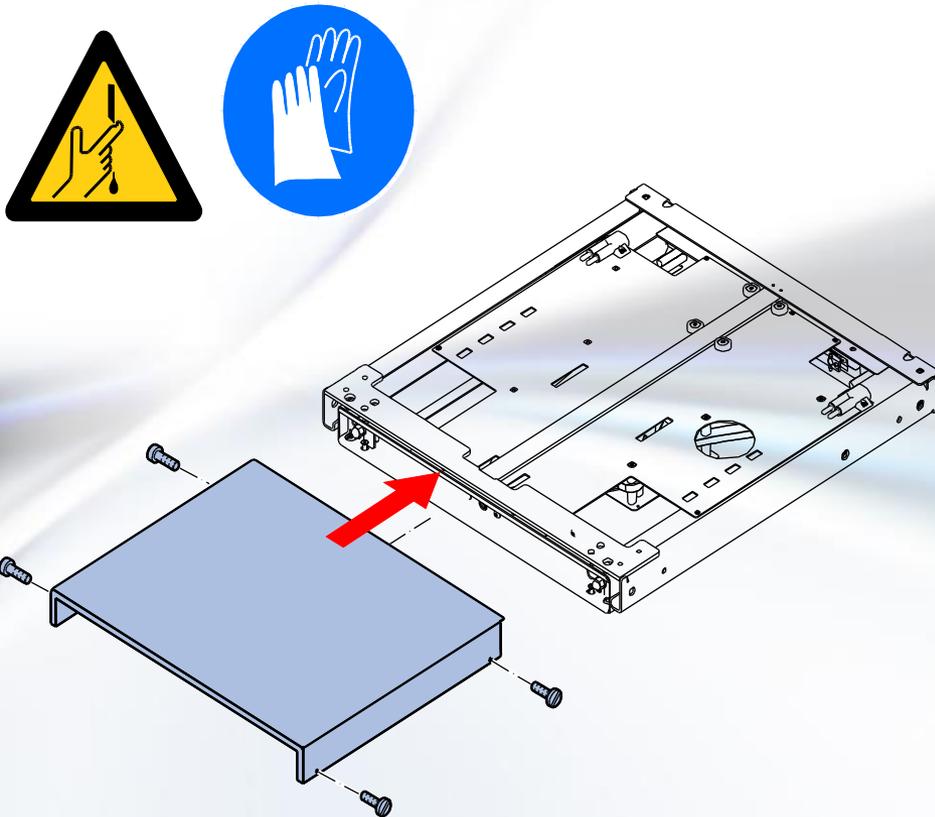

Mounting a BalanceBox[®] 400 to the Mobile stand

NOTE:
When mounting the BalanceBox[®] to the Mobile stand or floor support, or when using the Tilt feature always use the bottom mounting positions in addition to the wall bracket!

Mounting a BalanceBox[®] 400 to a brick wall

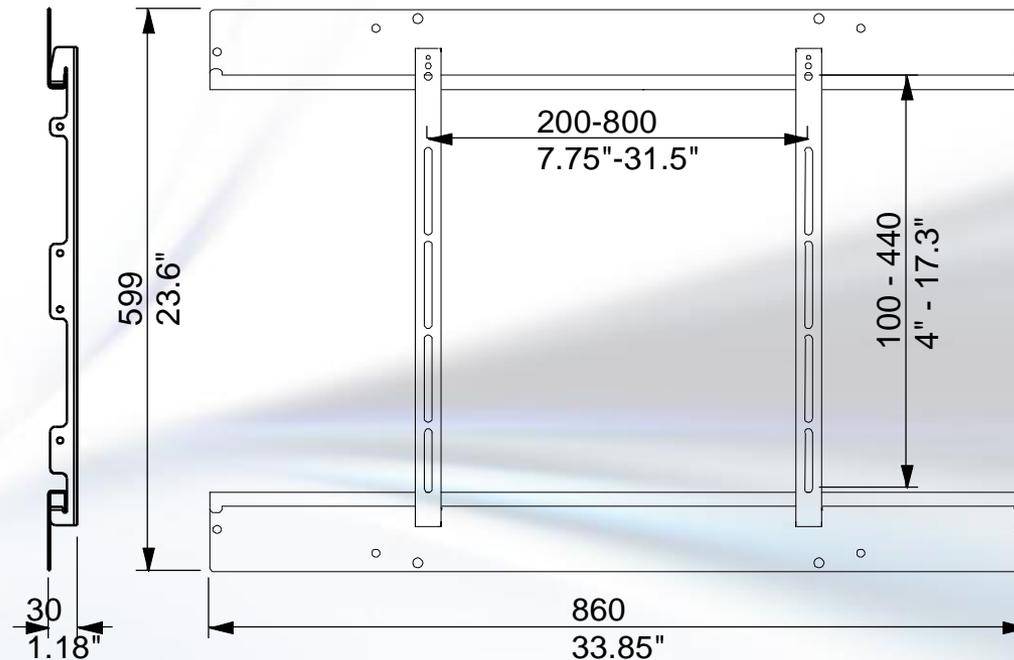

Mount the wall frame cover by sliding it in at the top between the wall frame and the application frame.
Tighten the screws

NOTE: the cover is NOT included with the BalanceBox[®] 400H

Mounting the Vesa bracket to the BalanceBox[®] 400

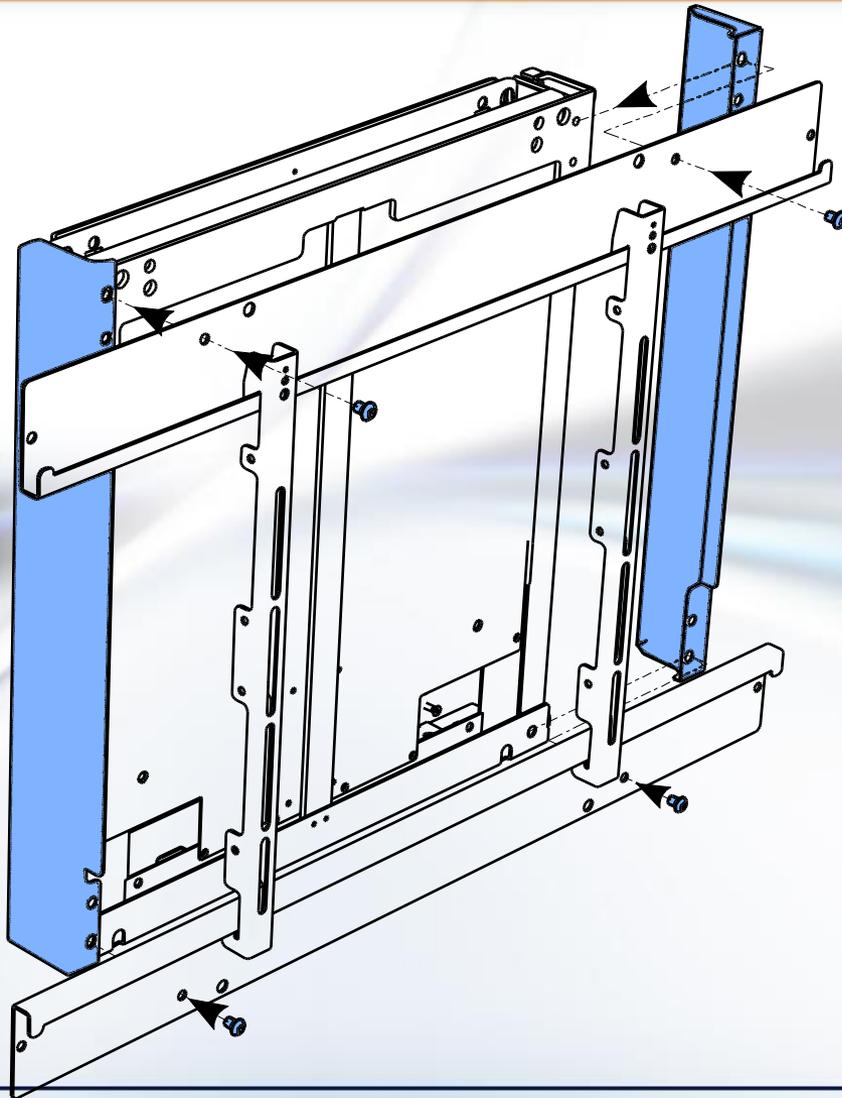

Vesa bracket is specific for mounting flatscreens to the BalanceBox[®]

- Metric hardware 4, 6 and 8 mm is included
- Various holes for anti theft steel cable provided

Mounting the Vesa bracket to the BalanceBox[®] 400

Mount both horizontal plates to the BalanceBox[®] together with the BalanceBox[®] side covers.

Use 8 mm (12mm/½" length max!) hex. button screws and a 5mm allen key

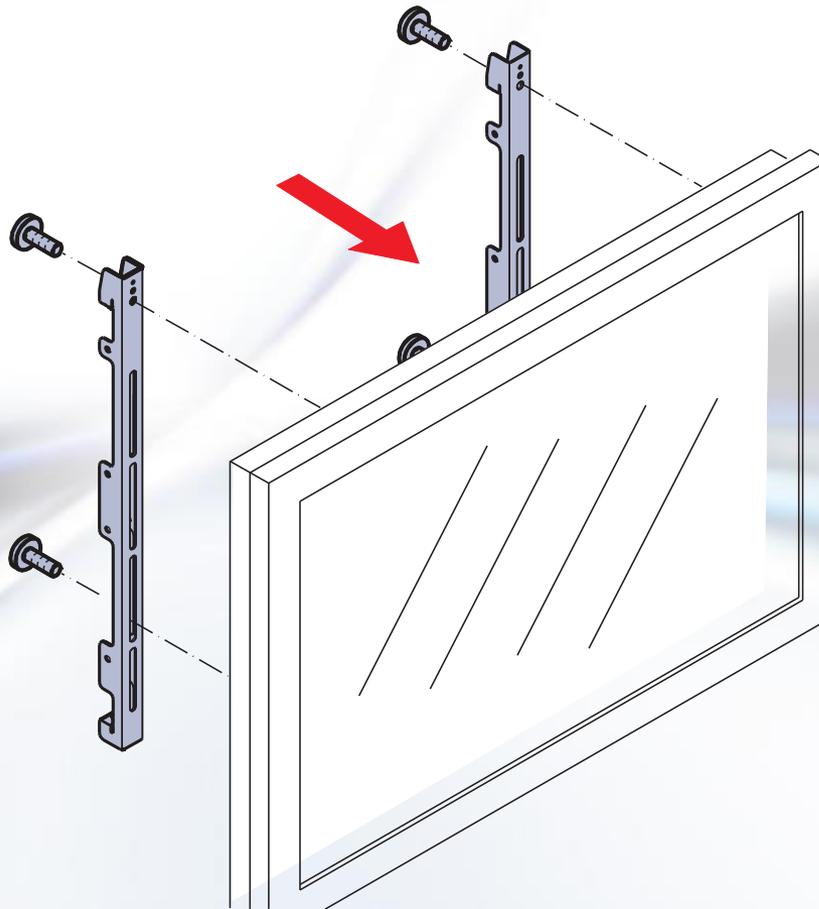

M8 screws longer than 12mm/ ½" will cause BalanceBox[®] to block.

NOTE: Top and bottom are identical but mounted mirrored

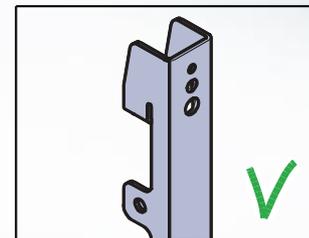

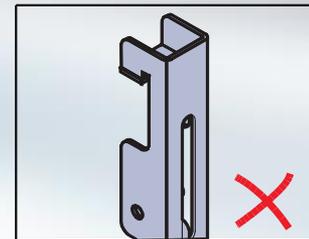

Mounting the Vesa bracket to the BalanceBox[®] 400

Mount both vertical profiles to the Flatscreen vesa connection

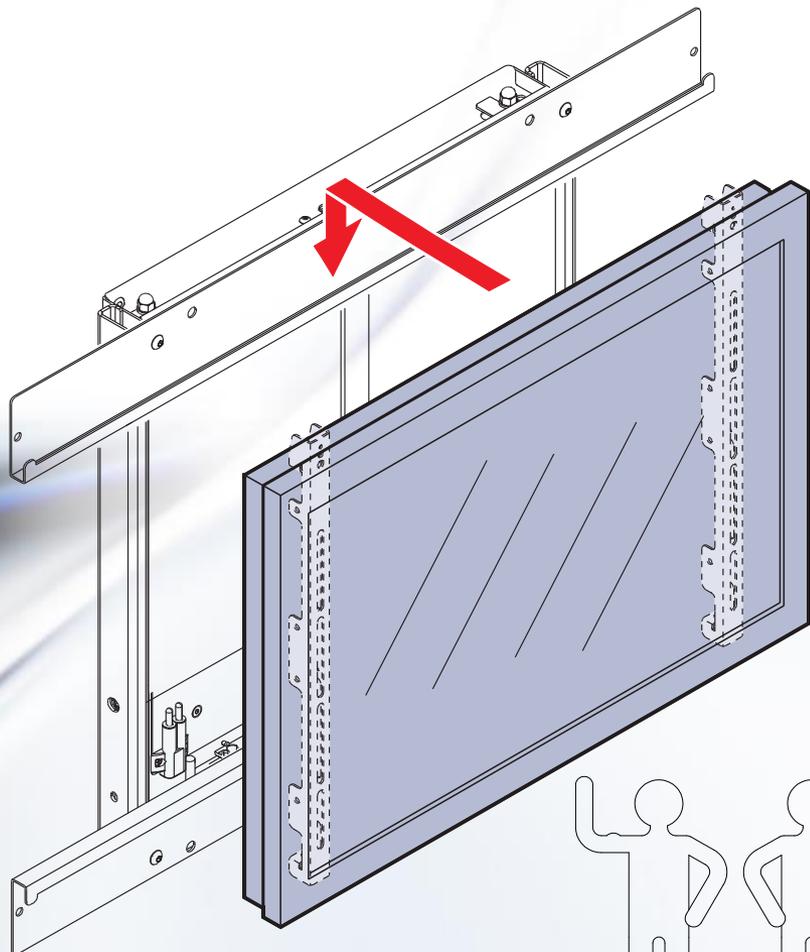

Use the metric 4, 6 or 8 mm screws provided (length 12mm/ ½") or fasteners /length as specified by screen manufacturer.

NOTE: round holes are the top of the profiles

Mounting the Vesa bracket to the BalanceBox[®] 400

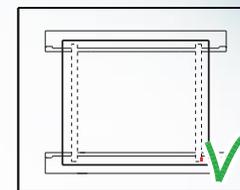

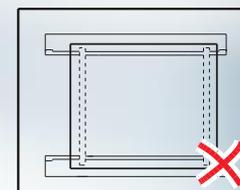

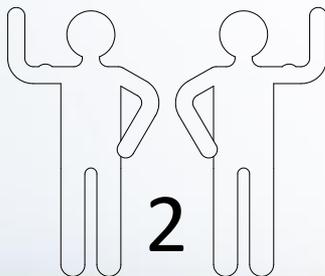

Lift the screen, with the vertical profiles mounted, on to the horizontal plates mounted earlier on the BalanceBox[®]

Make sure hooks on the top should be engaged fully on both sides.

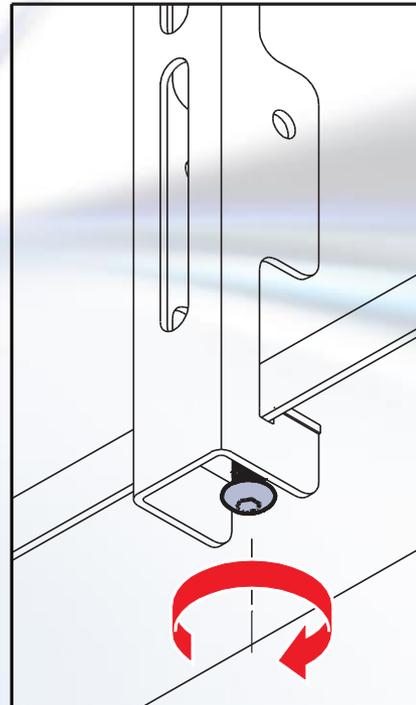

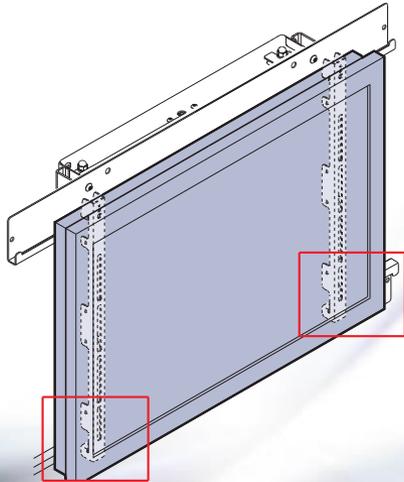

A two-man job!

NOTE: shift the screen left/right to center it on the BalanceBox[®]

Mounting the Vesa bracket to the BalanceBox[®] 400

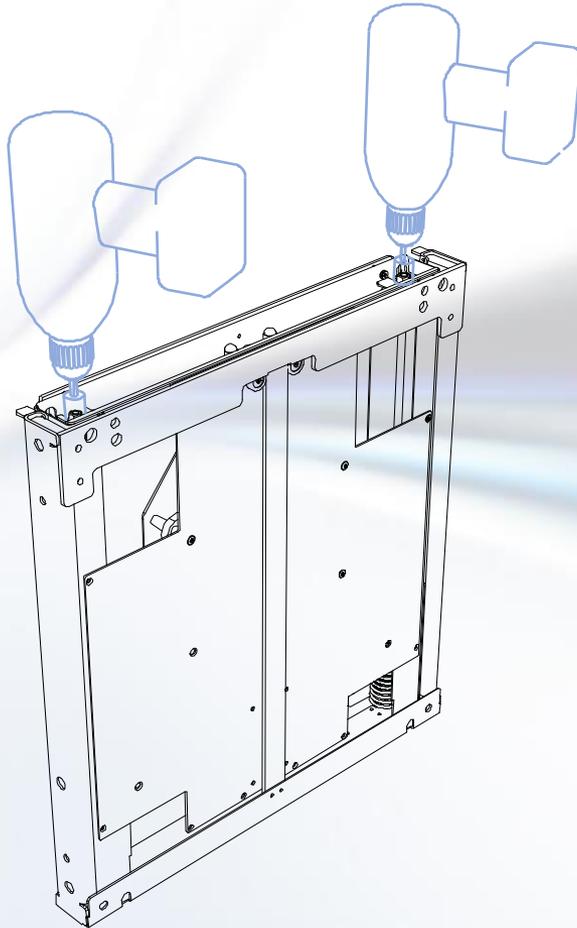

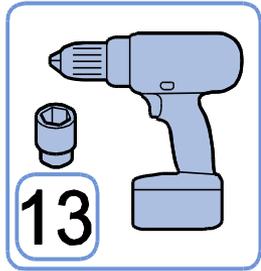

Tighten the 6 mm buttonhead screws from the bottom to secure the screen on the BalanceBox[®]

Use a 4 mm alan key, preferably a screwdriver style tool as shown.

Setting the springs on a BalanceBox[®] 400

Balancing:
Springs are always fully tightened for safety.

Use a drill driver and 13 mm socket, rotate counter clockwise (loosen)

Do 3 seconds left and 3 seconds right until the application starts to lower.

Now tighten until balanced
