NOTICE

- ◆ Install or place components of which power supply voltage is high enough to cause personal injury in places out of the reach of children.
- ◆ Do not use any types of power cables other than the one provided together with the product to prevent the product from being damaged.
- ◆ Do not open the enclosure unless you are a professional maintenance engineer to prevent an electric shock.
- ◆ Check if the electric supply voltage complies with the product's receiving power supply before use. Disconnect the product from the power supply if the product is not to be used in a long period of time.
- ◆ Use a three-phase power socket and ensure that it is properly grounded.
- ◆ Disconnect the product from power supply and stop using it if you sense any abnormal sound or smell emitted by the product. Find a professional maintenance engineer to service it.
- ◆ Do not let any liquid and metal object go into the product. If any liquid or metal object goes into the product, cut off the power and find a professional maintenance engineer to handle it.
- ◆ Do not place the product on an unstable stand, bracket or table. Otherwise, it may fall off and cause personal injury.
- ◆ Move the product carefully to prevent it from being hit or squeezed, especially the display part, which may cause injury if broken.
- ◆ Mount the product as instructed and using only mounting accessories recommended by the manufacturer.
- ◆ The product can only be mounted on a concrete wall, solid wall and wood plank wall that can bear over three times of the weight of the interactive panel. Ensure proper ventilation. You should assess the bearing capability of the wall before mounting the product on a special wall such as a steel-structure, hollow, glass or marble wall.

Mounting Requirements

Bearing

You can choose the portable or wall mounting method according to your needs. Wall mounting can substantially save the space.

If you choose portable mounting, use the mounting rack or support. If you want to use a self-made mounting rack, the bearing capacity of the rack should be at least four times of the actual weight of the display. The bearing capacity of the mounting support must be at least four times of the actual weight of the display to ensure steadiness of the interactive panel.

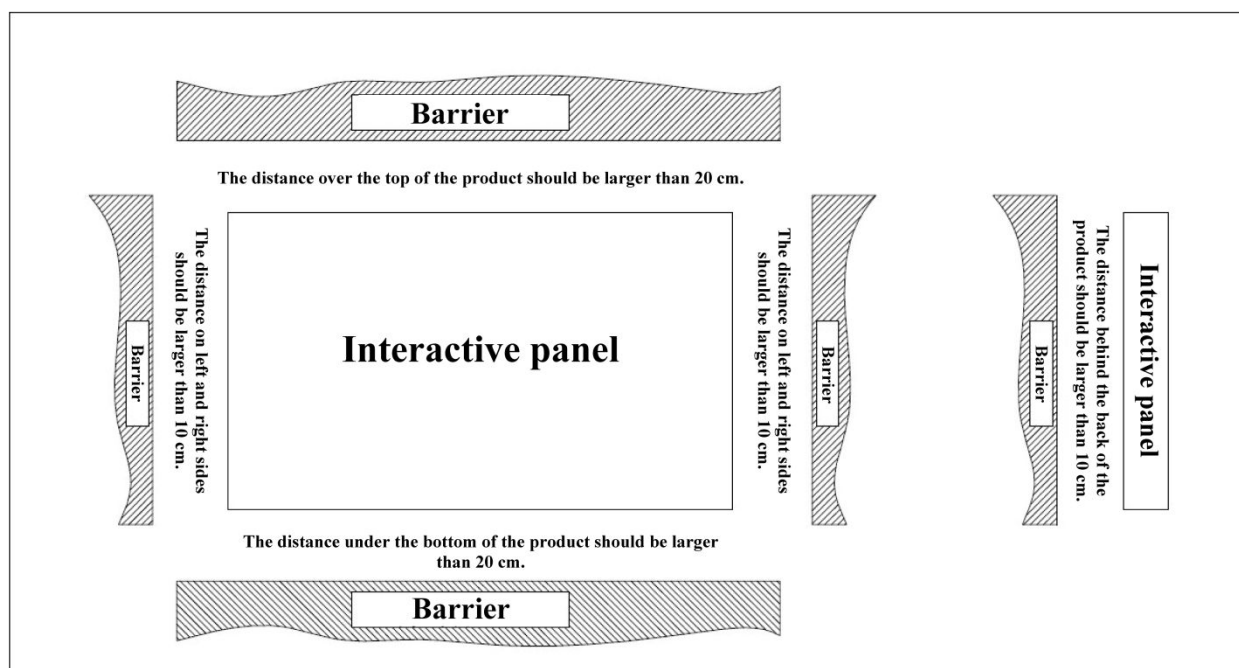

When you choose wall mounting, the bearing capacity of the mounting surface must be at least four times of the weight of the display. When the mounting surface is a wall or ceiling of a building, the wall must be built with solid bricks, concrete or materials of equal intensity. If you need to mount the display on a loose surface such as an old brick wall, wood plank wall, solid brick wall, metal or non-metal structure wall, or a wall with a thick decoration layer, take necessary consolidating measures to ensure that the display is steadily mounted.

Ventilation

| Ventilation requirements | Distance to the mounting surface (cm) | | | |
|--------------------------|---------------------------------------|-----|--------|------|
| | Left and right sides | Top | Bottom | Back |
| Larger than 100W | 10 | 20 | 20 | 10 |

Note: If the product is mounted inside a wall or a cabinet, in addition to the above-mentioned requirements, the area of ventilation holes at the bottom, top and two sides must be at least 50% of the sealing surface to ensure proper ventilation.

Introduction

Thank you for buying Interactive touch screen. As our latest independently developed and produced human-machine interactive products, the Interactive touch screen are multi-functional teaching displays for interactive teaching, digital demonstration, multi-media presentation, touch operations and handwriting. They are well designed and produced to meet needs of education applications, and provide a user-friendly experience, digital intelligent control as ideal apparatus for modern education. You can use your fingers or opaque objects to write, edit and delete any things on them.

Characteristics

- ◆ Specially designed for teaching and meeting systems
- ◆ Integrating user management module to realize user adding/deleting, switching and user information customized functions that coincide with users' preference
- ◆ Adopting infrared array scanning and sensing technology, HID drive-free, plug-and-play
- ◆ Outstanding display edit functions, supporting instant editing
- ◆ Multiple optional pens, width and colors; simulative brushes that are vigorous
- ◆ Multiple backgrounds, supporting customized background with any images and graphs inserted
- ◆ Support dual-point touch and multi-finger roaming; simulative mouse operation
- ◆ Supporting identification of handwritten Chinese, English, number and special characters
- ◆ Supporting conversion of handwritten files into other formats including PDF, JPEG, GIF, PNG, TIFF and BMP
- ◆ Intelligent geometric figure identification, able to identify multiple figures with high recognition rate and multi-pen identification
- ◆ Vector-based graphic processing with high compression rate and low distortion
- ◆ ECO back-light mode, lower power consumption
- ◆ High luminance and contrast display to ensure clear display under straight light or in outdoor environment
- ◆ Supporting SD card

Control panel

- 1]. HOME: Open the Android home page.
- 2]. RETURN: Go back or return to the parent menu.
- 3]. MENU: Show or hid menu. .
- 4]. ECO: Switch over to ECO, Auto or Standard mode.
- 5]. SOURCE: Show or exit from the list of signal sources.
- 6]. VOL+: Increase the volume.
- 7]. VOL-: Decrease the volume.
- 8]. PC Pwr: Turn on/off the OPS computer.
- 9]. Touch port 1 only supports 2m USB cable.

Interface Panel

Functions of Remote Controller

- 1].  : On or standby
- 2].  : Mute
- 3]. 0--9: Select TV channel or enter number
- 4].  : Open the Android home page.
- 5].  : Go back or return to the parent menu.
- 6].  : Show or hid menu.
- 7].  : Show or exit from the list of signal sources.
- 8].  : Enable Alone mode.
- 9].  : Freeze.
- 10].  : Up/Down/Left/Right direction buttons
- 11].  : Confirm.
- 12].  : Capture screen shots.
- 13].  : Show the current signal source. You cannot show it in Android.
- 14].  : Adjust screen displaying.
- 15].  : Open WIFI on the computer.
- 16].  : Change the display mode.
- 17].  : Turn to the previous page on white board software and PPT.
- 18].  : Turn to the next page on white board software and PPT.
- 19].  : Open white board software.
- 20].  : Switch over to VGA signal source.
- 21].  : Switch over to HDMI signal source.
- 22].  : Switch over to OPS computer signal source.
- 23].  : Zoom up and down.

Basic Operation

Start Up

- Power the interactive panel with a 100-240V 50/60Hz AC power supply.
- Connect the panel to the power supply. Switch on the rocker switch (on the left of the rear of the panel, next to the power cable port) to enter the standby status. The power LED turns red.
- Press **Power** on the control panel or **Standby** on the remote controller to turn on the interactive panel. The OPS computer is started. The power LED turns green.

Shutdown

- Press **PC Power** to turn off the OPS computer (for all-in-one models only).
- Press **Power** on the control panel or **Standby** on the remote controller to enter the standby status. The power LED turns red.
- Under the standby status, switch off the rocker switch to turn off the interactive panel.

Note:

- 1] Please turn off the OPS computer before the interactive panel. Otherwise, the computer can be damaged.
- 2] Please disconnect the interactive panel from power after the panel enters standby status. Otherwise, the panel can be damaged. A sudden power failure can damage the interactive panel.

Software Installation

- **Recommended configuration:**

CPU: Inter (R) Core i3 2.27GHz or AMD CPU with equivalent performance

Memory: 1GB

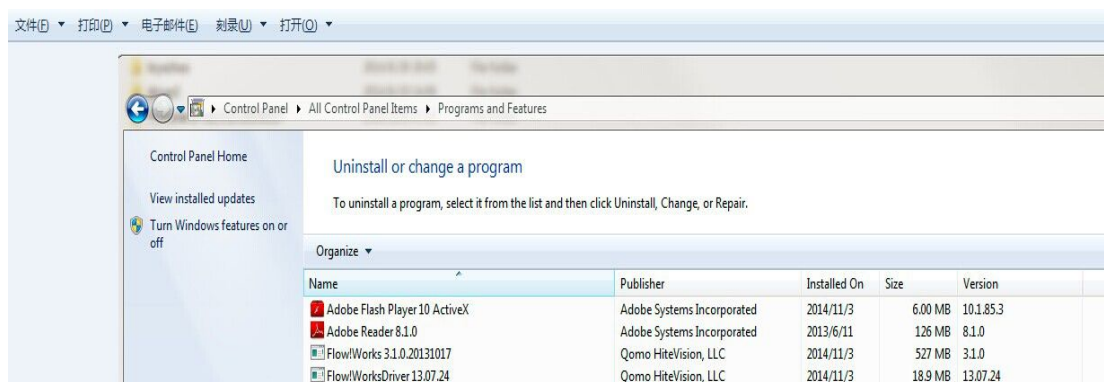

Hard drive: 1GB

Graphics card: supports DirectX 9 or above

- If the interactive panel is equipped with the latest version of handwriting software in the PC before being delivered, please skip the step.
- HID drive-free function only applies for Vista, Windows 7 or higher version (realize the functions of multi-touch etc.). The touch LCD display with Windows XP version should install/run the software for normal use.
 1. Insert the official USB cable into the USB ports of the computer and touch LCD display.
 2. Insert the official software installation disk into the computer.
 3. Double click the , follow the instructions and complete the installation of the touch LCD display software.
 4. The computer needs to restart so as to activate the software after installation completed. Save all the files in the computer and restart.

Software Uninstall

If you are sure to delete the touch LCD display software from your computer, click "Add or Remove Programs" in "Control Panel". Choose "Flow!Works" and click "Uninstall" to uninstall.

Software Calibration

To work normally, the handwriting of the projected image on the touch LCD display should coincide with the actual one so as to calibrate accurately. The following situations need calibration.

- When you first use the interactive LCD panel;
- Re-install the drive program;
- When you connect the panel to another PC;

The handwriting panel adopts nine-point calibration method. The position process is described as follows:

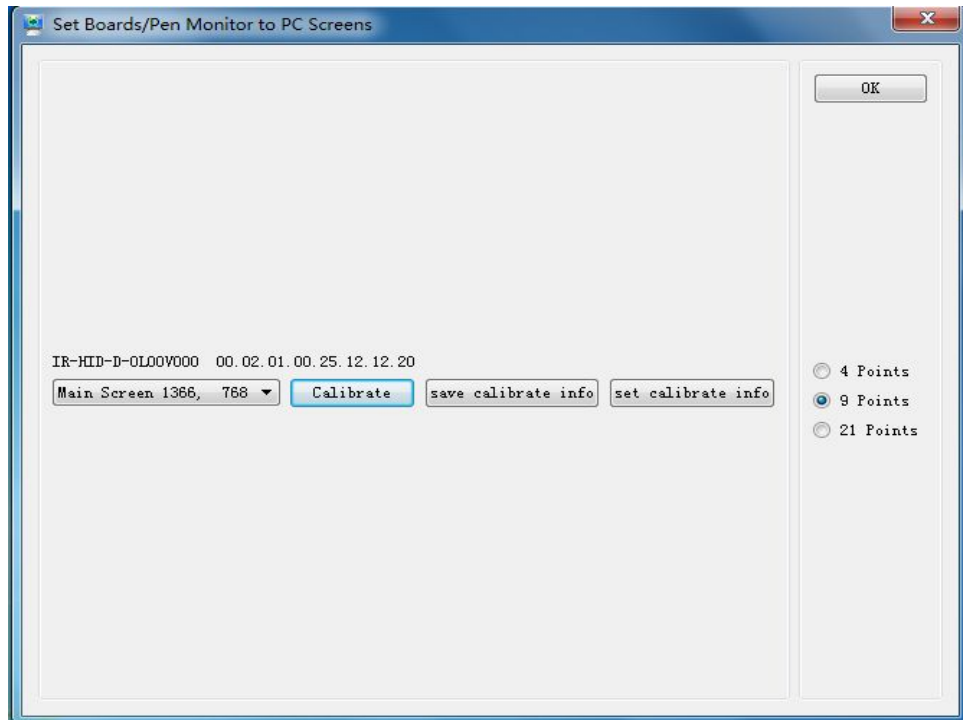

- ① Connect the panel and run the drive program;

Click the handwriting drive icon on the right bottom of the panel to show the following image::

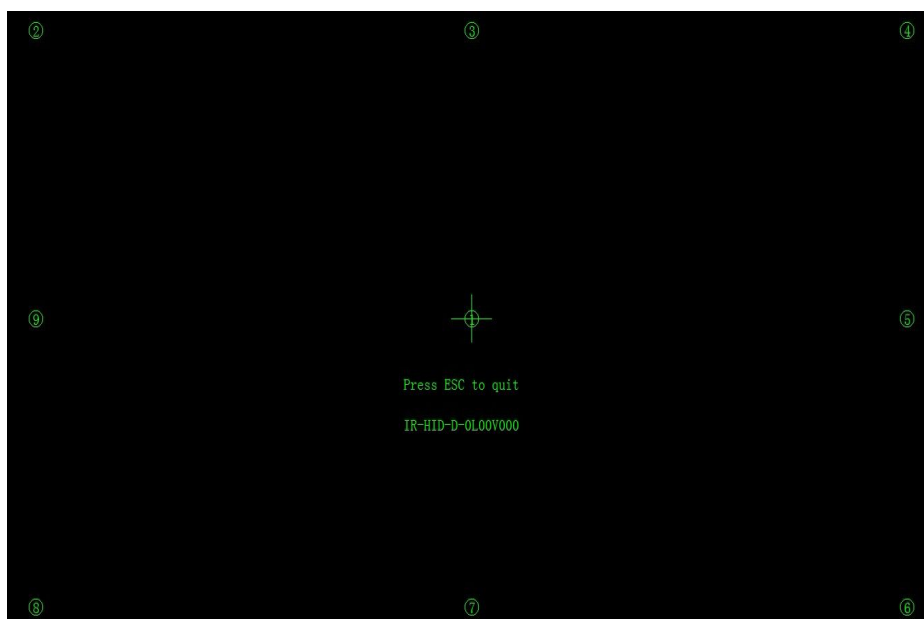

1. Connect the display and run the drive program;
2. Click the handwriting drive icon on the right bottom of the display to show the following image:

3. Select **Nine Points** and click **Calibrate**.

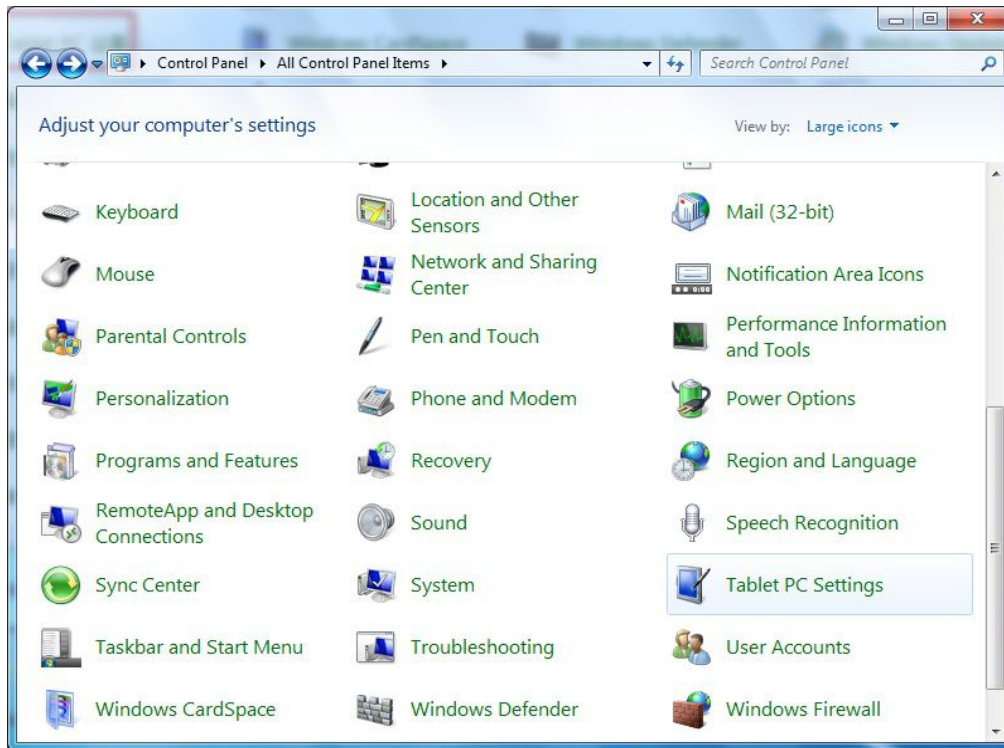

4. Use the pen to click and hold the center of the flickering cross. Do not release it until the flickering cross moves to the next positioning point. Complete the calibration process as instructed. After it completes, you will return to the desktop automatically.

Positioning Method for Windows 7

1. Connect the interactive panel to PC using the USB lead via the USB interface on the panel;
2. Select **Tablet PC Setting** on **Control Panel**.

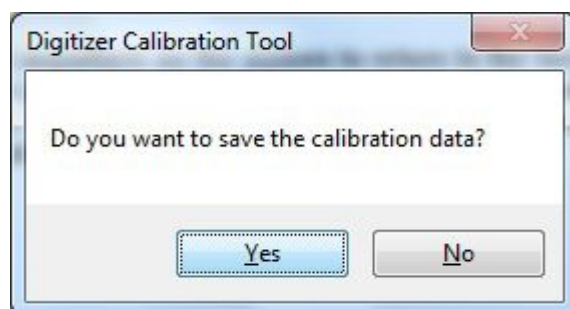

3. Select  on the setting window.

Use the pen to click and hold the center of the flickering cross. Do not release it until the flickering cross moves to the next positioning point. Complete the positioning process as instructed.

Click **Yes** after it completes.

Hits & Tips

- To ensure the handwriting accuracy, use the pen provided together with the interactive panel rather a finger to perform calibration.
- Calibration errors may cause touch functions of the interactive panel fail. In that case, please perform positioning again.
- Tap ESC on the keyboard during the positioning process to cease positioning.
- The calibration interface varies between different software versions. Please follow instructions provided on the actual interface.

Assemble OPS Computer

Insert OPS computer into the slot and fasten it with two M4 screws on the left and right.

Note:

The OPS computer is not plug-and-play. Disconnect the interactive panel from the power before inserting the OPS computer.

Smartbar

The smartbar has three modes: Home Page, White Board, and Remarks.

Under any of the three modes, you can click  on the toolbar to go back to the previous page and click  to exit from other programs or go back to the home page from other signal sources.

- ◆ On the home page, the smartbar is under the home page mode and shows icons of the white board, album, file manager, system setting, browser and listen alone mode. You can click an icon to open the corresponding program.

(Home page mode)

- ◆ After the white board program is started, the smartbar enters the white board mode, under which you can choose a pen, line and color to write on the white board. Click  and select New Page, Overview, Delete or Setting from the menu.

(White board mode)

- ◆ In programs other than the white board, the smartbar is in the Remarks mode. You can select a pen, line and color to add notes and remarks on the file opened (including image, PPT and PDF).

(Remarks mode)

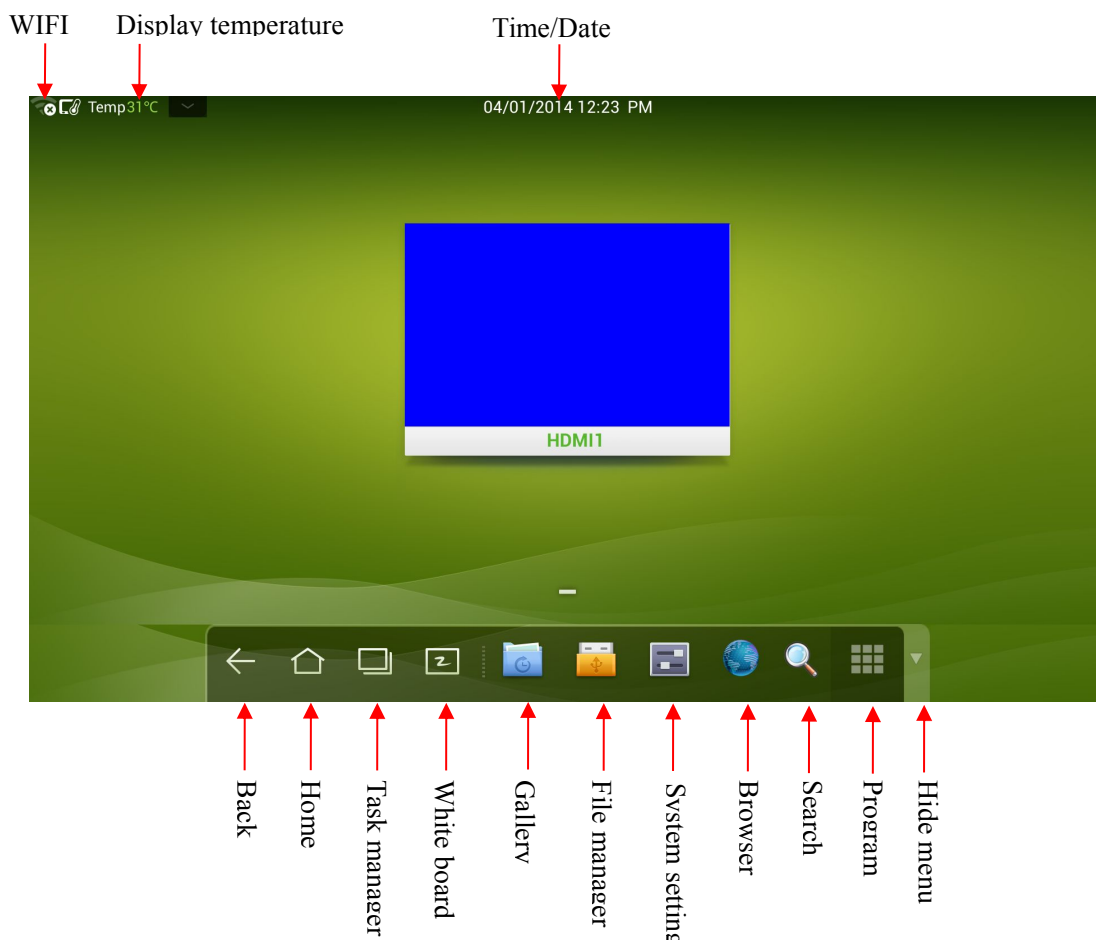

Note: Click ▼ on the right to hide the toolbar. Scroll down with your finger to show the smartbar.

Home Page

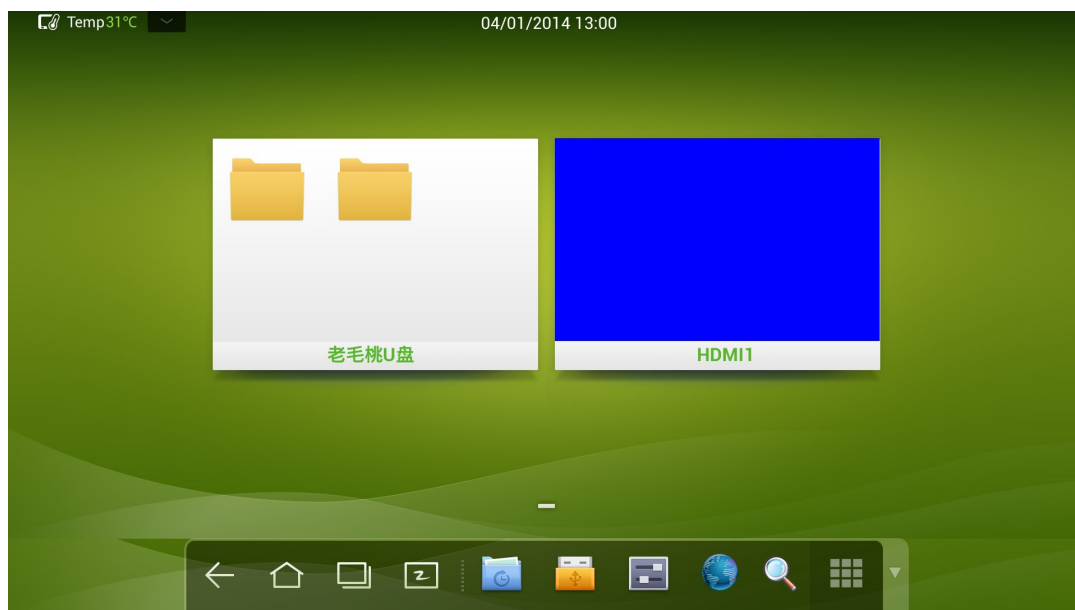

The home page provides the preview function that displays three items:

- 1] OPS computer preview
- 2] External PC preview such as laptop
- 3] Portable device preview such as flash disk and SD card

Click  on the smartbar or Home button to enter the home page and show the preview window. When more than three preview windows are displayed, additional windows will be displayed on the second page. Scroll left and right to turn page.

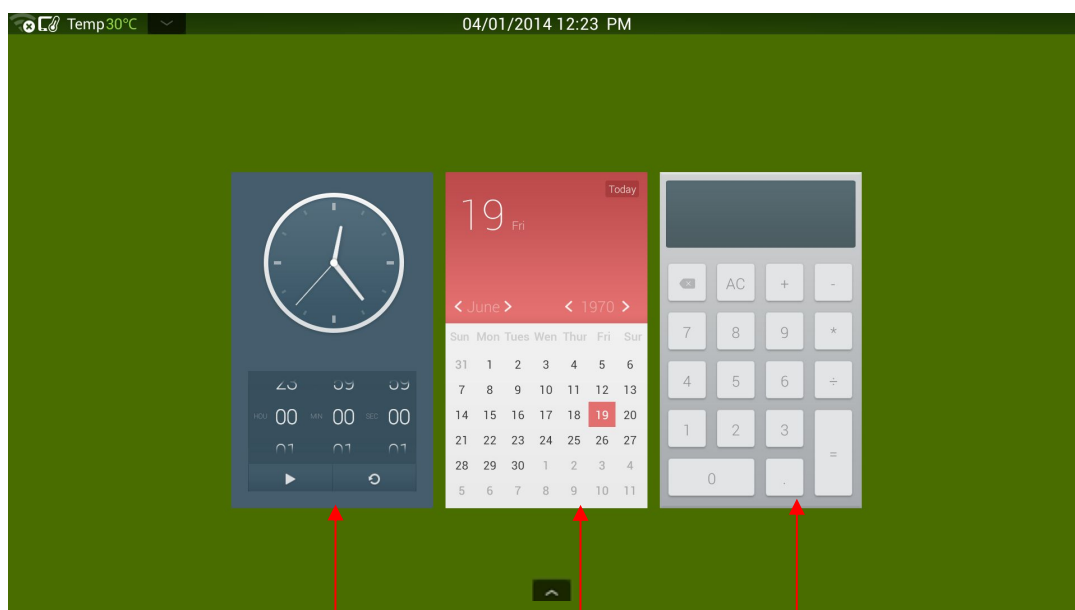

The following figure shows the interface when a SD card is inserted into an all-in-one interactive panel.

Click the SD card preview window to open the SD card interface.

Click  on the upper left corner of the home page to show tools, clock, calendar and calculator. Click  at the bottom to hide tools and go back to the home page.

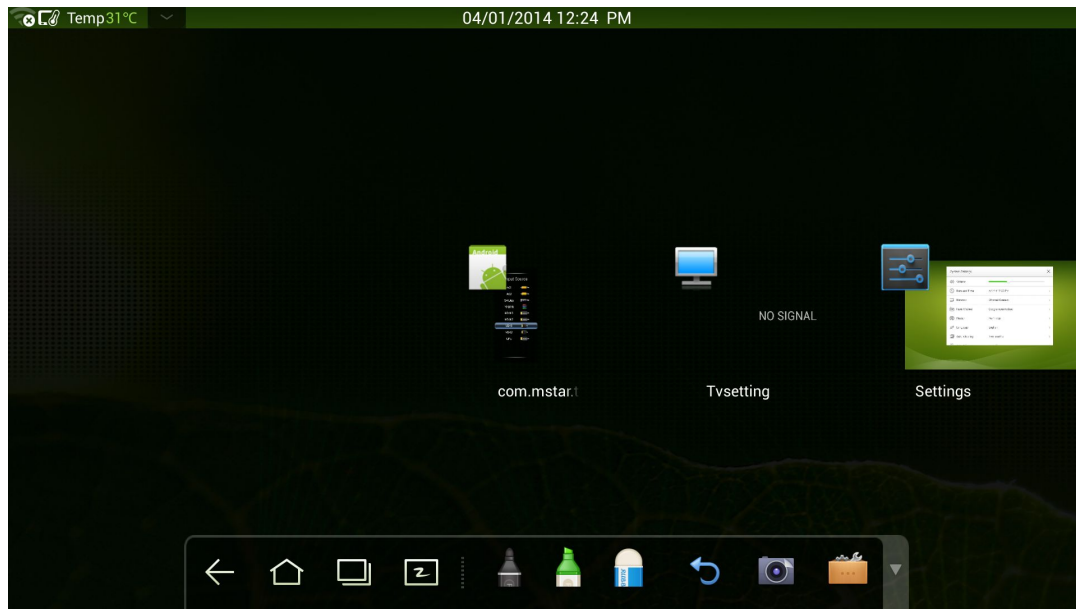

Clock

Calendar

Calculator

Task Manager

In the task manager, you can view currently running programs, switch and end programs. Click  to enter the task manager as shown in the following figure:

◆ View running programs

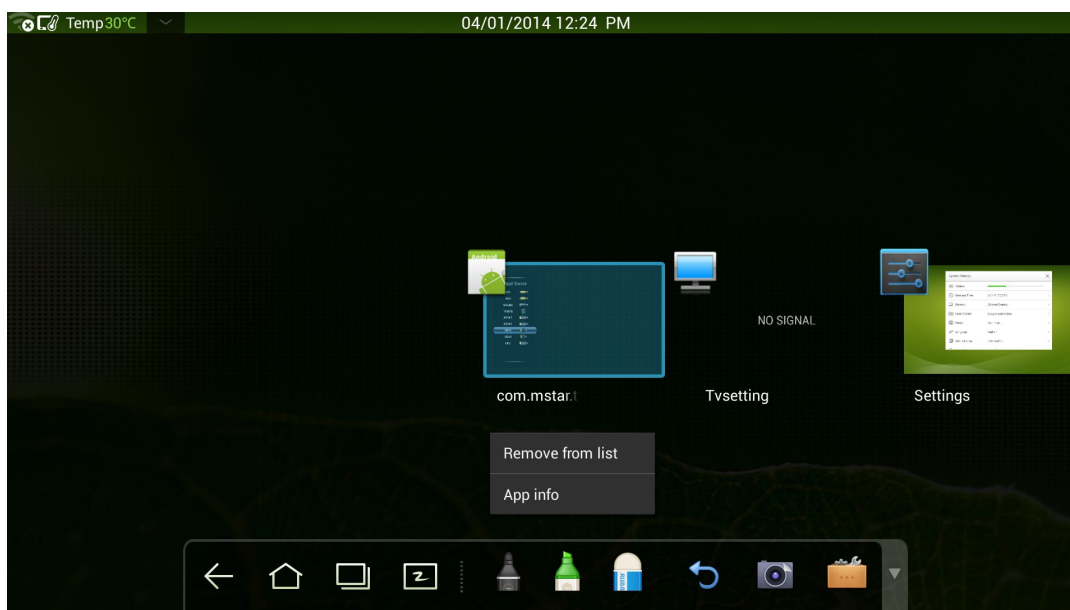

In the task manager, scroll left and right to view currently running programs.

◆ Switch programs

In the task manager, click a program to switch over to the program. For example, click **View ES File** to switch over to the ES file program; click **Albums** to switch over to the gallery; and click **File Browser** to switch to the browser program.

◆ End programs

In the task manager, click a program and scroll up and down to end the program, or click a program and hold it for several seconds to show a prompt box. Click **Remove from List** to end the program.

White Board

The white board provides the writing function. In the white board program, you can select a pen, line and color to write and use eraser to erase content on the white board. You can also print and clear the content on the white board.

Click  on the smartbar or press White Board on the remote controller to enter the white board interface:

◆ New White Board and Setting

Click  and select New Page, Overview, Delete All or Settings from the menu.

Click Settings to set the color and shade of the white board.

◆ Pen/Line/Color

If you want to use marker, click and hold  for two seconds to set the line and color.

If you want to use highlighter, click and hold  for two seconds to set the line and color.

◆ Eraser

If you make an error or want to erase something, click  to use the eraser to erase the content that you want to erase.

◆ Cancel

Click  to cancel operations.

◆ Capture

Click  to capture the content on the white board and save it as an image under the Screenimage directory. You can open the directory through the following ways:

- (1) Go back to the home page and click  on Smartbar to enter the file manager. Find folder Screenimage in the file system.
- (2) Click  to enter **Fast View** and open folder Screenimage.

Note: Press **Capture** on the remote controller to save it as an image under the Screenshot directory in the file manager.

◆ Print/Clear

Click  to show **Print** and **Clear** item. Click Print to print the content on the white board. Click Clear to clear things written on the white board.

Gallery

You can enter the album to view images one by one or as slides.

Click  on Smartbar to enter the album to show all folders containing images.

Click a folder to show images contained in the folder.

◆ Single image

Click one image in a folder. Scroll left to show the previous image and right to show the next.

Under the single image mode, you can click icons on upper right corner of the image to delete, cut and edit the image.

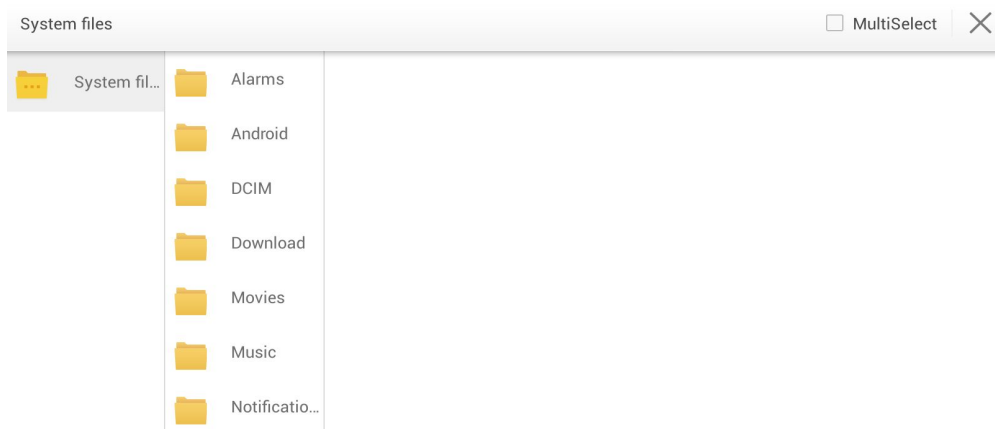

◆ Slide

Click  on the upper right corner of the folder and select Slide to view images as slides.

File Manager

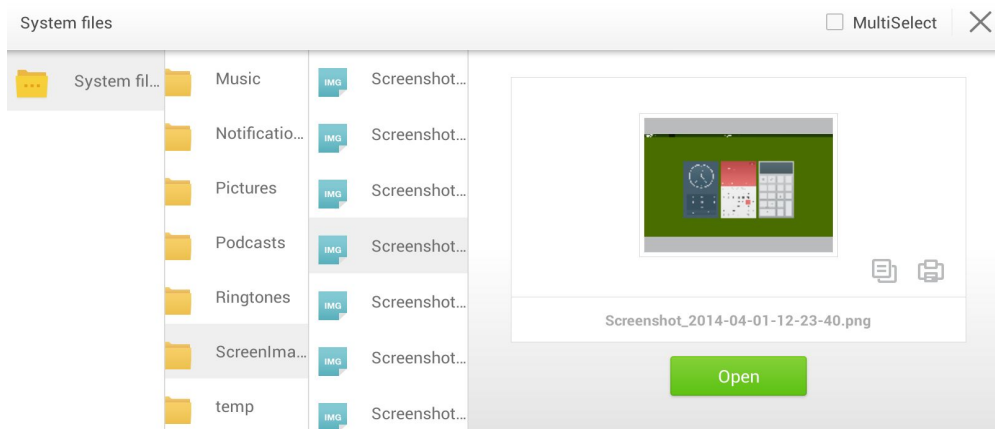

In file manager, you can copy, print and view files in the system.

Click  on Smartbar to enter the file manager interface and show the file system. It also shows files in portable devices such as SD card and flash disk.

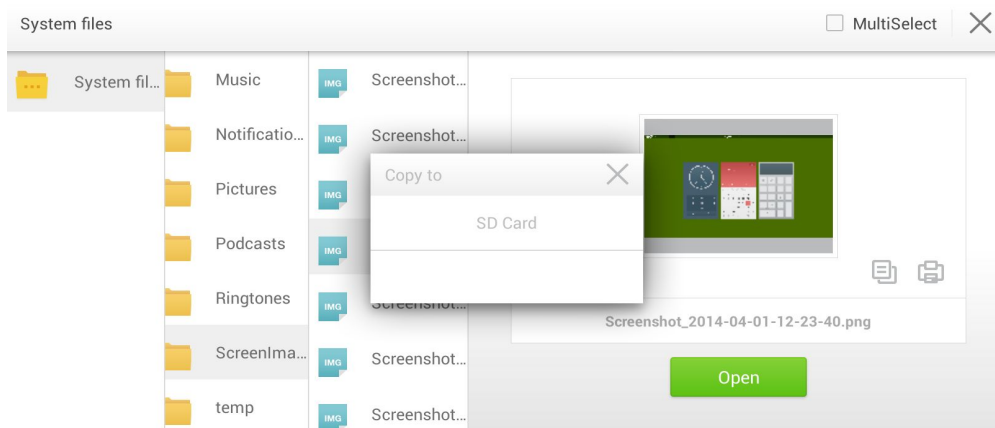

◆ Copy

Click one file or tick off **Multiple** and choose several files.

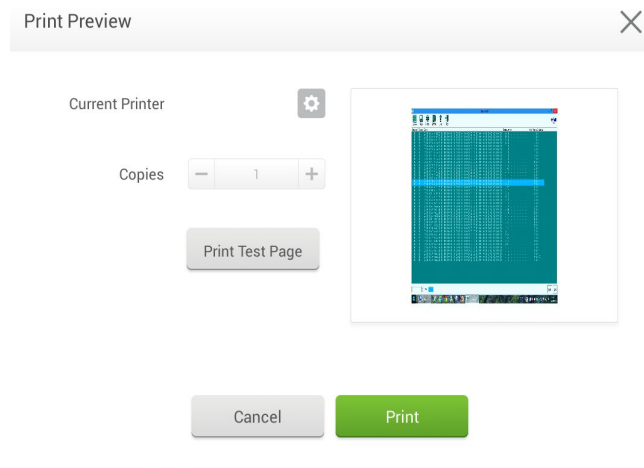

Click  to copy selected files to the portable device.

◆ Print

Click  to open the preview page. Click  to set the printer. Click  and  to set the number of copies to be printed. Click  to start printing.

◆ View

Click  to open a file. You can view files including images, music, word, PPT and PDF.

System Settings

Click  on Smartbar to enter the system settings page, which includes options including **Volume**, **Date and Time**, **Network**, **Input Method**, **Printer**, **Language**, **Clear Screenshot**, **Auto Brightness**, and **About Android**.

Set Time/Date

Click **Date and Time** to enter the time/date setting interface.

Click **Using 24 hour format**. When it is grey, it is 12-hour system. You can click **AM** or **PM**. When it is green, it is 24-hour system.

Click Auto Update. When it is grey, you can modify the time and date. When it is green, the time and date will be automatically updated by the system.

Click here to set month

Click here to set year

Current Time 12:30 PM

Save

Using 24 hour format ☐ Auto update ☐ GMT-05:00, Eastern...

Click to enter the time zone setting interface as follows:

| time zone | | |
|--------------------------|----------|-----|
| Eastern Time | GMT-4:00 | |
| Atlantic Time (Barbados) | GMT-4:00 | |
| Manaus | GMT-4:00 | |
| Santiago | GMT-4:00 | |
| Atlantic Time (Canada) | GMT-3:00 | |
| Brasilia | GMT-3:00 | |
| ... | ... | ... |

After setting, click to save it. Click < on the upper left corner or Back on the remote controller to go back to the parent menu. Click × to close the current page.

Net State

Click Network to show the Network status, Ethernet, WI-FI and Proxy settings. Choose a network connection method and set parameters accordingly.

| <div><div><</div>Net state<div>></div></div> | |
|--|--------------------------------|
| <div><div><div></div></div>Network status</div> | Connect format |
| <div><div><div></div></div>Ethernet setting</div> | Cable network card can not use |
| <div><div><div></div></div>Wi-Fi setting</div> | |
| <div><div><div></div></div>Proxy setting</div> | |
| <div><div><div></div></div>Wi-Fi hotspot</div> | |
| | |
| | |
| | |

◆ LAN setting

If the panel is connected with LAN cable and supports Dynamic Host Configuration Protocol (DHCP), the system will automatically configure the network protocol (IP) value.

| < Net state | | × |
|--|---|-----------------|
|  Network status | Automatic IP Addressing  | |
|  Ethernet setting | IP Address | 0.0.0.0 |
|  Wi-Fi setting | Subnet Mask | 255.255.255.255 |
|  Proxy setting | Default Gateway | 0.0.0.0 |
|  Wi-Fi hotspot | First DNS | 0.0.0.0 |
| | Second DNS | 0.0.0.0 |
| | | |
| | | |

If you want to manually set the network protocol, enter the IP address, default gateway, and DNS server parameters on the software keyboard or remote controller. Slide  to select the subnet mask to be changed. After setting, click < on the upper left corner or **Back** on the remote controller to go back to the parent menu. Click × to close the current page.

< Net state

Language

Click **Language** to show options including Chinese (Simplified), Chinese (Traditional), and English. Select a language. Click < or **Back** to return to the parent menu. Click × to close the current interface.

Clear Screenshots

Click **Clear Screenshots** to show options including One Month, Two Months, Three Months, Six Months, and Twelve Months. Select a period. Click < or **Back** to return to the parent menu. Click × to close the current interface.

Auto Brightness

Click **Auto Brightness** to show options including Time delay and Real-Time. Click **Time-Delay** and auto brightness adjustment will be delayed for five minutes. Click **Real-Time** to enable auto brightness adjustment immediately. Click < or **Back** to return to the parent menu. Click × to close the current interface.

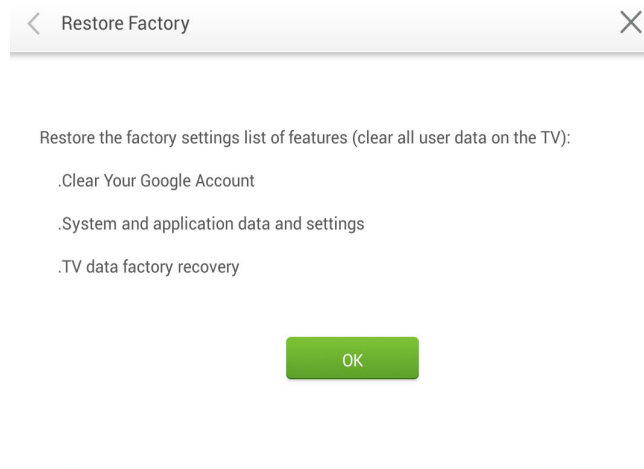

Restore Default Setting

Click **About Android** to show the following interface. Click **Reset**.

Click **OK** to restore the default setting. Click < on the upper left corner or **Back** on the remote controller to go back to the parent menu. Click × to close the current page.

Browser

Click  on Smartbar to open the web browser. Enter a website and keywords to search on the software keyboard or remote controller.

Programs

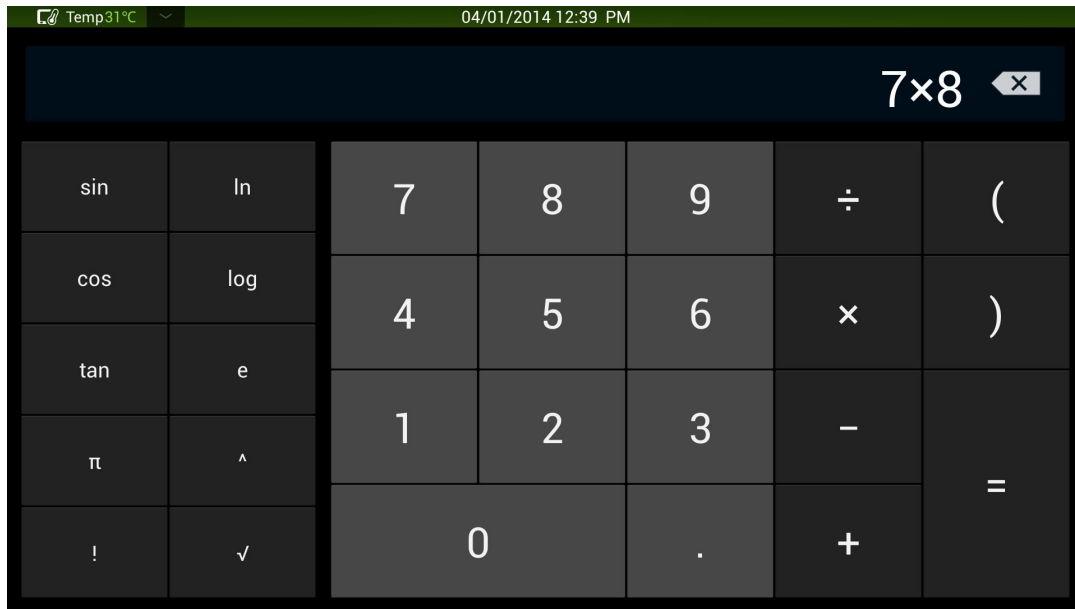

Click  on the Smartbar to enter the program interface and show all programs in the system. Scroll right and left to turn the page as follows:

(Page 1)

Calculator

Click  to enter the calculation page. Click numbers and characters on the keyboard.

Clock

Click  to enter the clock page. Click **Start** to start timing and **Stop** to stop it.

Music

Click  to start the music program. The system will display songs in the local disk by artists, albums, file names, playlist and playing status.

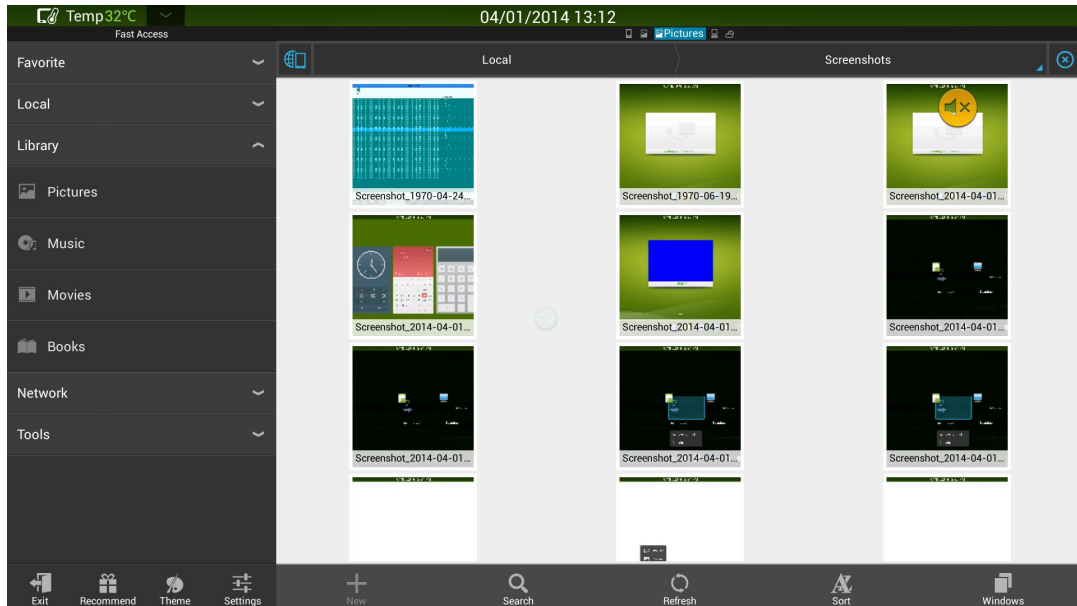

ES File

Click  to open ES File. You can copy, cut, delete, move and rename files.

Select an image to display  and  on the upper right corner of the interface. Click  on the upper right corner of the interface to select a file and click  to select all files.

Temperature Measuring

Click  to measure the temperature of the panel.

Select Signal Channel

There are three ways to select a signal channel:

- 1.1 Press **Signal** on the remote controller.
- 1.2 Press **Signal** on the control panel of the interactive panel.
- 1.3 Click  in the Programs page.

Open **Signal** to show the following interface. Press ▲/▼ to select an option and press **OK**. You can also click an icon on the interface.

Note: The interactive panel will automatically detect signals when it is started or there is no signal.

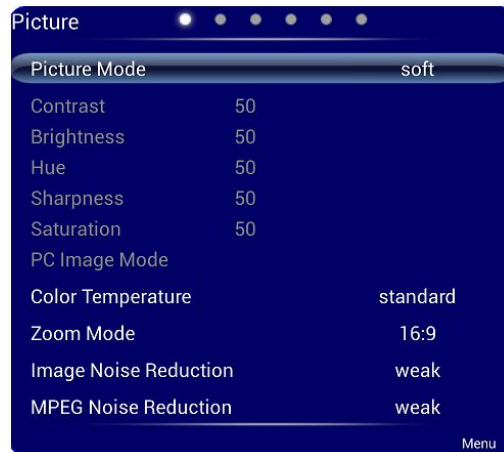

Menu

Press Menu on the remote control to show the menu (**Image**→**Sound Mode**→**Channel**→**Setting**→**Time**→**Parent Control**). Scroll left and right on the screen or press ◀/▶ to switch between options.

Picture

The **Image** menu shows options including **Picture Mode**, **Color Temperature**, **Zoom Mode**, **Image Noise Reduction**, and **MPEG Noise Reduction**. There are two ways to set it:

- 1.1 Click an icon and set it.
- 1.2 Press ▲/▼ to move the cursor onto an option. Press **OK** and press ◀/▶ to adjust the value. Press Back to quit the menu.

😊 Note: When the image mode is **User**, you can adjust the contrast, brightness, hue, sharpness and saturation.

Sound Mode

The **Sound Mode** menu shows options including **Sound Mode**, **Equalizer**, **Balance**, **Surround**, **SPDIF Output** and **Alone**. There are two ways to set it:

- 1.1 Click an icon and set it.
- 1.2 Press ▲/▼ to move the cursor onto an option. Press **OK** and press ◀/▶ to adjust the value. Press **Back** to quit the menu.

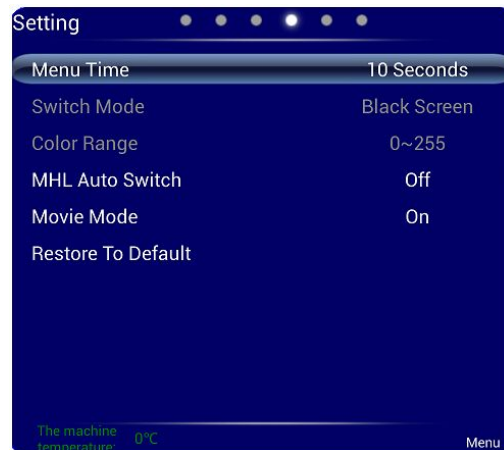

😊 Note: When the sound mode is set to **User**, you can adjust **High Pitch** and **Low Pitch**.

Setting

The **Setting** menu shows options including **Menu Time**, **Switch Mode**, **Color Range**, **MHL Auto Switch**, **Movie Mode**, and **Restore To Default**. There are two ways to set it:

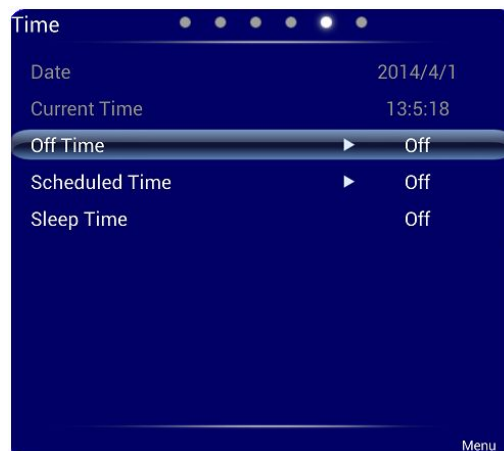

- 1.1 Click an icon and set it.
- 1.2 Press ▲/▼ to move the cursor onto an option. Press **OK** and press ◀/▶ to adjust the value. Press **Back** to quit the menu.

Time

The **Time** menu shows options including **Date**, **Current Time**, **Off Time**, **Scheduled Time**, and **Sleep Time**. There are two ways to set it:

- 1.1 Click an icon and set it.
- 1.2 Press ▲/▼ to move the cursor onto an option. Press **OK** and press ◀/▶ to adjust the value. Press **Back** to quit the menu.

Parent Control

The **Parent Control** menu shows options including **Lock System**, **Set Password**, **Block Program**, and **Lock Children**. There are two ways to set it:

- 1.1 Click an icon and set it.
- 1.2 Press ▲/▼ to move the cursor onto an option. Press **OK** and press ◀/▶ to adjust the value. Press **Back** to quit the menu.

Note: This menu is only available when TV signal source is used.

ECO Mode

Press **ECO** on the remote controller to enter the ECO mode (ECO-Auto-Standard). Press this button to switch among the three modes.

- The power consumption will be halved under the ECO mode.
- Under the Auto mode, the display will automatically adjust the brightness of the screen according to the light from the environment. When the surrounding light is strong, the screen will bright up. When the surround light is weak, the screen will darken.
- Under the Standard mode, the screen brightness will stay the same.

Note: To save energy, please switch off the panel when it is used; and switch the panel to Alone when you do not need to watch the display, thus cutting power consumption.

Serial Port Control

The RS-232 port of the interactive panel is defined as follows:

Connect RS-232 port to the PC or controlling device. Enable RS-233 serial port connection and complete the following configuration.

| Port: COM1 (Set according to PC or controlling device's port number) | | | |
|--|--------|----------------|------|
| Bit rate | 115200 | Odd/even check | None |
| Data bits | 8 | Stop bit | 1 |

The following table lists button controlling codes. The buttons share same functions with corresponding buttons on the remote controller:

| Function | Controlling codes | Function | Controlling codes |
|----------------|----------------------------------|-----------|----------------------------------|
| Power on | 7F 08 99 A2 B3 C4 02 ff 01 00 CF | 1 | 7F 08 99 A2 B3 C4 02 ff 01 21 CF |
| Power off | 7F 08 99 A2 B3 C4 02 ff 01 01 CF | 2 | 7F 08 99 A2 B3 C4 02 ff 01 22 CF |

| Music | WMA, MP3, M4A, (AAC) | .mp3, and .m4a |
| Text | TXT | .txt |

FAQ & Troubleshooting

| Failure | Possible cause | Solution |
|--|---|---|
| Fail to connect to the service program | The drive program is not correctly installed. | Install the drive program correctly. |
| | The USB interface (lead) is not connected or is faulty. | Change the USB lead or check if the USB interface is faulty. |
| | The infrared tube is blocked. | Ensure that the surrounding infrared tubes are not blocked. |
| The panel needs re-positioning every time it is switched on. | The computer is equipped with a recovery card. | Disable computer protection and perform the positioning again. |
| The positioning is inaccurate. | You do not perform the positioning as instructed. | Press Auto on the remote controller to fully cover the display with an image and use the pen provided together with the panel to perform positioning again. |
| The cursor of the pen is unstable when the pen is used. | Wrong writing method | Use the pen rather than a finger to write. Grasp the pen as far to the nib as possible. The angle between the pen and display should be larger than 60 degrees. Do not let sleeve or wrist touch the display. |
| | Strong light or infrared interference | Remove the interference source or change the using environment. |
| The handwriting is discontinuous. | Wrong writing method | Use the pen rather than a finger to write. Grasp the pen as far to the nib as possible. The angle between the pen and display should be larger than 60 degrees. Do not let sleeve or wrist touch the writing surface. |

| Failure | Possible cause | Solution |
|--|--|---|
| | The required covering area is not reached when writing or the nib is too small. | Change the nib or use a pen with a larger covering area. |
| | The infrared tube is blocked. | Check if infrared tubes are blocked. |
| | Strong light or infrared interference | Remove the interference source or change the using environment. |
| Unable to write | The color of strokes is same as or similar to the background color. | Change the color of strokes. |
| | You hand or other objects are put on the display when writing. | Use the pen rather than a finger to write. Grasp the pen as far to the nib as possible. The angle between the pen and display should be larger than 60 degrees. Do not let sleeve or wrist touch the writing surface. |
| | Strong light or infrared interference | Remove the interference source or change the using environment. |
| | Wrong writing method | Use the pen rather than a finger to write. Grasp the pen as far to the nib as possible. The angle between the pen and display should be larger than 60 degrees. Do not let sleeve or wrist touch the writing surface. |
| Not sound and image | <ol style="list-style-type: none"> 1. Check if the power cable is connected to the power socket and if the panel is connected to power. 2. Check if the rocker switch on the interactive panel is switched on. 3. Check if the Standby button on the panel is pressed. 4. Check if the video and audio input cables are connected correctly. 5. Check if the panel is switched to the right signal source. 6. Check settings including image brightness and contrast. 7. Check the volume. | |
| Image is normal, but no sound | <ol style="list-style-type: none"> 1. Check the volume. 2. Check if the Mute button on the remote controller is pressed. 3. Check if the audio cable between the PC and interactive panel is connected correctly. | |
| No image or the image is black and white | <ol style="list-style-type: none"> 1. Adjust color settings. 2. Check the color system. | |
| Image or sound is interrupted | <ol style="list-style-type: none"> 1. Find out the electric appliance that causes the interference and move it away from the interactive panel. 2. Do not connect the panel to a power socket that a disrupting electric appliance is connected to. | |

| Failure | Possible cause | Solution |
|---|---|----------|
| The remote controller fails. | <ol style="list-style-type: none"> 1. Change the batteries. 2. Clean the launch window at the top of the remote controller. (Check if it is blocked) 3. Check contacts of the batteries. | |
| Computer cannot be started (applicable for models with computers) | <ol style="list-style-type: none"> 1. Check if the computer adapter is correctly connected and is connected to power. 2. Check if the computer is connected correctly to the interactive panel. | |

Self-inspection:

The following phenomena are not failures:

- ◆ Given the high-precision production technology, the LED panel may have a very few constantly bright or dark pixels, which turn out to be tiny red, blue, green or dark points on the panel. The phenomenon is normal.
- ◆ The panel may make slight sound when it is adjusting backlight or it is cooling.
- ◆ When the image and sound are normal, and you touch the LED panel with fingers, you may feel static electricity. The temperature of the rear of the panel and product is high. These are normal phenomena.

Maintenance Tips

- ◆ Do not put or install the product near a heat source or under direct sunlight, in dusty or humid places, or where the product can be affected or damaged by mechanical vibration. To maximize the performance, it should be put away from equipment such as grid, large metal objects and radar stations as far as possible.
- ◆ Do not wipe the panel with any chemical agent. Solvents may damage the enclosure or paint. If the panel is stained by dust, please cut off the power, soak the clean cloth in warm water, wring it to clean the panel. You should use a clean soft cloth to clean the LED display of the panel.
- ◆ Do not frequently switch on and off the product. This can shorten the product's service life. After the panel is switched off, please wait for three minutes before switching on it again. If the product is not to be used for a long period of time, please disconnect the product from power supply.
- ◆ Do not maximize the brightness and contrast of the LED display for a long period of time, which can shorten the LED display's service life.
- ◆ Do not write on the touch screen with a hard object, which can scratch the LED display.

Specifications

| | |
|------------------------------|---------------------------|
| Backlight type | LED |
| Aspect ratio | 16:9 |
| Viewing angle | 178° |
| Physical resolution | 1920*1080 Pixel |
| Image/Sound system | PAL/DK, I |
| Working voltage | AC 90-265V, 50/60Hz |
| Touch screen material | Tempered glass |
| Sensing method | Infrared |
| Technical feature | HID drive-free |
| Touch point | Multi-touch |
| Writing method | Fingers or pen |
| Resolution of touch screen | 32767*32767 |
| Communication interface | USB |
| Storage temperature/humidity | -20°C~60°C, 10%~90% |
| Working temperature/humidity | 5°C~50°C, 10%~90% |
| Installation method | Wall or portable mounting |
