

2026 FEATURED PRODUCTS

interactive is a given.
intuitive is QOMO.

qomo.com or scan the QR code.

good tech steps back,
so people can step forward.

We believe technology should support presence, not interrupt it. It should make teaching easier, conversations clearer, and collaboration feel natural—not complicated. That's why we design collaboration tools that feel intuitive from the first touch, adapt to real rooms and real people, and stay out of the way when they're not needed.

**Not because technology isn't powerful—
but because people are.**

INTERACTIVE DISPLAYS

touch screens worth focusing on.

the best displays don't compete for attention.
they support it.

QOMO interactive displays make it easier to share ideas, explain concepts, and work together—without pulling focus away from the people in the room.

Designed to feel simple and dependable, each display reduces setup and interruptions so learning, conversation, and collaboration can take center stage.

bundleboard™ i

4K | Android 14 | Google EDLA-Certified | NFC Reader
For rooms that need more capability and customization—without becoming complicated.

i complete me.

Built for rooms that change throughout the day, **BundleBoard i** supports multiple users, workflows, and teaching or presentation styles. With secure, personalized logins, individuals can quickly access their tools, settings, and content—making it easy to move between activities without reconfiguring the space.

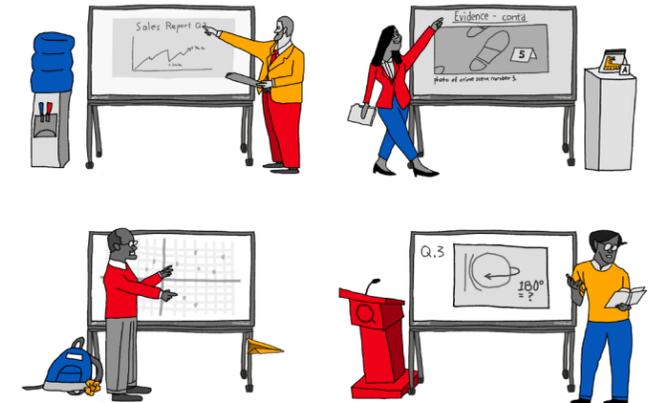

simpleboard™ j

4K | Modular | Simplified Setup
For spaces where clarity, flexibility and ease matter most.

basic on purpose.

SimpleBoard j is built for simplicity and flexibility across rooms. With no built-in operating system, it works with the platform your organization chooses—making it easier to standardize setups and keep everyone aligned.

With fewer built-in components to manage, it's easier for IT teams to support and maintain, delivering a reliable experience every time.

GRAB AND GO

wanderboard™ 32

4K | Portable Stand | Built-In Camera + Mic
For moments that don't happen at a desk or on a wall.

grab-and-go collaboration.

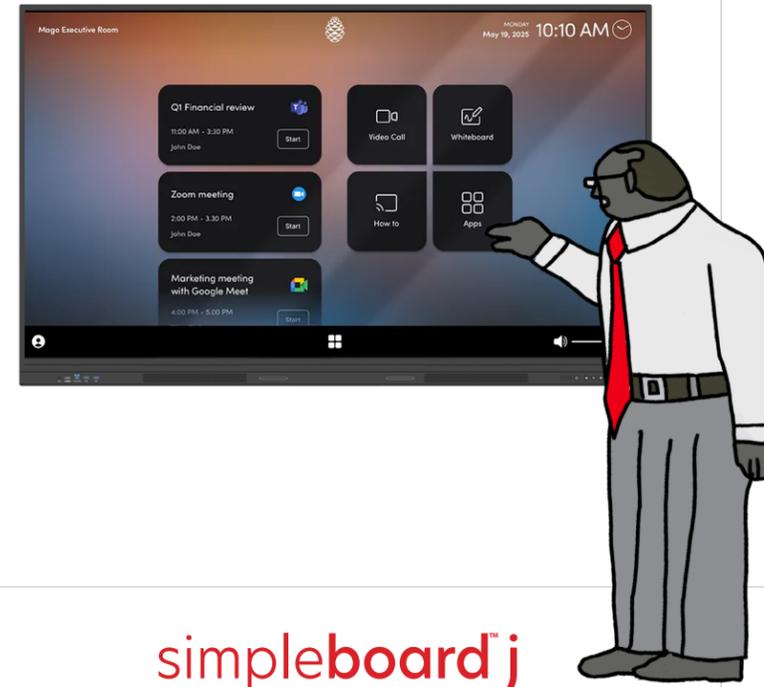

WanderBoard 32 is designed for flexible workspaces, moving easily between rooms, groups, and ideas. It rolls between spaces and rotates vertically or horizontally, so content fits the moment.

With a built-in camera and Android system, it's ready for collaboration wherever work happens.

three displays.
three ways to work.

INTERACTIVE PODIUMS

write, speak, share. never look away.

keep your eyes on your audience
and your ideas front and center.

Designed as the front-of-room anchor,
the **PresenStation 800F1** gives presenters a dedicated
place to write, navigate, and share. Everything stays
within reach—without stepping away from the audience.

presenstation™ 800F1

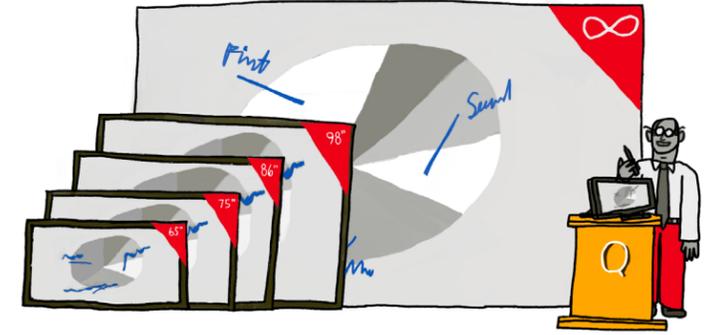

4K | EM Battery-Free Pen | Capacitive Touch

For teaching and presenting while staying connected to the room.

The **PresenStation 800F1** is designed to help you stay present while you **write, draw, navigate, and respond in real time**—using your fingertips or a stylus on a **responsive capacitive touchscreen**. Everything stays in front of you, so interaction happens face-to-face with your audience, not behind a screen.

big screen? bigger screen? entire wall?

The **PresenStation 800F1** moves your content from display to display—even entire walls—with no change in how you teach, speak, or present. Slides, annotations, and visuals appear exactly where you expect them to, whether you're working with a monitor, a large display, a full-wall surface—or to infinity.

built for real presentation setups.

Multiple connection options—including **HDMI input and output, USB-C, and USB extenders**—make it easy to integrate the PresenStation into existing rooms.

ergonomic by design.

Includes an **angle-adjustable ergonomic table mount** for comfortable positioning during use, along with **VESA mounting options** that adapt easily to different room layouts.

WIRELESS SHARING ACCESSORIES

share without breaking the flow.

Some of the most important ideas are the hardest to show — a detail on a page, an object on a table, a sketch mid-thought.

With QOMO's **wireless sharing tools**, bringing those moments into the room is **as easy as a click of a button**—instant, clear, and without interrupting teaching, presenting, or collaborating.

qshare™ 110

4K | Wireless Casting | No Network Required
For fast, wireless sharing from personal devices.

big throw. clean catch.
crystal-clear 4k.

With **QShare 110**, content moves from laptops, tablets, and cameras to the display in a single step — staying clear, responsive, and reliable as the room works together.

Because when sharing is easy, ideas don't slow down.

cast without joining the wifi.

Everyone — even guests — can share content without hopping onto the network. **QShare 110** keeps casting simple and accessible, so ideas can move freely without logins, permissions, or delays.

turn any display into a sharing hub.

QShare 110 keeps sharing smooth and dependable, even as people move, devices change, and conversations evolve. Supports native casting from iOS, macOS, Windows, and Android—compatible with AirPlay, Miracast, and Android casting.

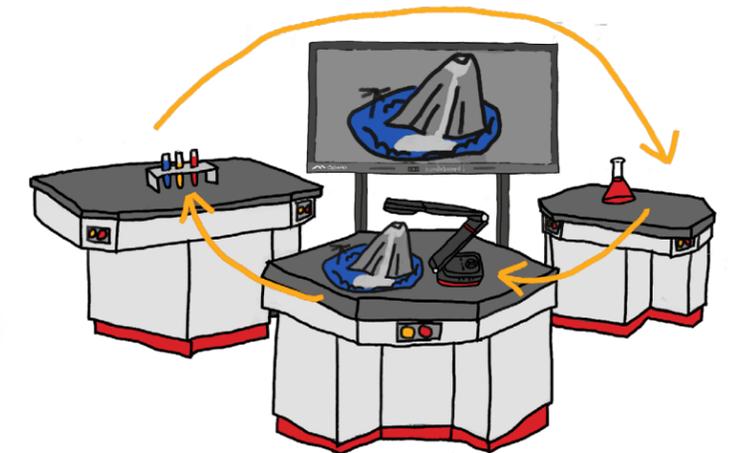

setup so simple it barely counts as setup.

QShare 20 enhances **WanderCam Pro** with wireless camera image sharing—**no Wi-Fi, drivers, or software required**. It's **software-agnostic**, working seamlessly alongside conference calls and presentations. **Plug it in, press the button, and the image appears instantly on the display.**

qshare™ 20 + wandercam™ pro

4K | Plug-and-Play | Wireless Sharing
For sharing physical details, demonstrations, and close-up work—from anywhere in the room.

show the small stuff from any spot.

WanderCam pro captures crisp detail wherever you move, and **QShare 20** makes it instantly visible on the display. Together, they turn desks, labs, and tabletops into shared moments — without stopping to configure or troubleshoot.

we make collaboration technology work the way you want it to.

QOMO is a leading US brand and global manufacturer of educational and collaboration technology. From doc cams to interactive touch screens, we're the only partner who comes with a fully-integrated (and adaptable) product line that's easy to use and easy on the budget. After doing this for more than 20 years, we understand how to work with everyone from CEOs and CTOs to district administrators and classroom teachers.

QOMO focuses on creating user-friendly technologies that allow everyone to enjoy what they do best.

How do you say our name?
