Brief introduction

The BundleBoard i is designed for global education scenarios. It is fast, efficient, secure and easy to use. With the help of BundleBoard i, teachers can easily bring fun and interactive classroom experience.

Now, BundleBoard i is EDLA certified. With the addition of Google apps and the brand new system design, Bytello OS is bringing more possibilities for teaching.

New features from EDLA-certified OS

Setup wizard

Bytello OS EDLA version has a new setup wizard with necessary device settings and Google services settings.

The new setup wizard contains below steps:

- Welcome page
- Network settings
- Copy data from old device
- Google account login
- Google service settings
- PIN code setting
- Google assistant settings
- Google Pay settings
- Other Google settings
- Bytello settings(country & region)
- Bytello account mode settings

		**			0		*
			*			*	
			Connect to Wi-Fi	GlobalPass, Wrt 2.40		Copy apps & data	You can choose to inamily your apps, plotter, contacts, Google Account, and more

	 English (United States) 			+ Add new network			
Hi there	 Vision settings 						
		_					
		9004					
			+		Serve offen	+	Early New York

You can choose "setup offline" in network setting page to skip all Google settings and only need to go through the below settings:

- Google service settings
- PIN code setting
- Bytello settings(country & region)
- Bytello account mode settings

Launcher

After finishing setup wizard, you will be presented the new Bytello OS EDLA launcher.

The new launcher contains below elements:

• Status bar on top, containing time, app notifications and status icons such as Wi-Fi, USB connection etc.

- Time & date widget
- Browser widget
- Google search widget
- Apps: Q Board, Finder, Google Play Store, Google apps folder and Chrome
- Bottom Menu

2:39AM ✿ ♥ 单 ■ •	[]			Ģ

Settings Volume - Volume +	Browser	Apps Strees	cost Inputs Finder	Profile

Long press on the blank space in launcher to call up the launcher menu. In the launcher menu you can change wallpaper and style, add new widgets to launcher and change launcher settings.

All the widgets and icons are movable, you can create a new page by long pressing and dragging a widget or an icon and place them into another page.

Long press and drag the app icon or widget to "remove" button to get the item removed from launcher.

Long press on app icon to call up the app menu, including below elements:

- Get app info
- Split screen(left or right)
- Other quick access registered by the app

Tap "Apps" icon or swipe up from anywhere in launcher to call up all apps menu.

3:21AM 🗢 🛡 🔳 🔿 🔸	ā	287 746

Control & notification center

You can swipe down from anywhere in launcher to call up control & notification center.

In control center, you can directly adjust brightness and do quick controls by tapping on the tiles. Some tiles support extended control, usually they have an arrow in the tile, you can press the tile to enter the extended control page first. For example, the Internet tile below supports extended control.

tap on the "pen" icon to enter the tile editing page, you can drag to edit the order of tiles to decide which tiles to be shown in control center.

tapping "active apps" bar calls up active apps page, you can see all the active apps here and choose to stop them if not needed.

tapping "user" icon to see all the users on this device. You can manage users by tapping "User settings" button in this page.

tapping "Settings" icon to open system settings.

tapping "Power" icon to open power menu, you can choose to lock, shut down or restart the device.

All app notifications will be displayed in notification center. Tap on the notification to enter the app interface.

You can also tap the arrow in notification to expand or fold it.

tap "Manage" button to enter notification settings.

If there are too many notifications, you can tap "clear all" to clear all clearable notifications.

New Recents

Bytello OS EDLA version has a new background management page called Recents. Same as before, you can view and manage all opened tasks in this page, and now we have new quick action icons "Screenshot" and "Split-screen" in Recents page to help you have a better capture or multitasking experience.

System navigation

In QOMO Bytello OS EDLA version, besides QOMO Launcher (from sidebar, Botton Menu), there are 2 extra navigations:

• Gesture navigation: same as Android mobile phones, swipe inwards from left right edges of screen to trigger Back, swipe up from bottom edge to trigger Home, swipe up from bottom edge and hold to trigger Recents.

• 3-button navigation: always show navigation bar at the bottom of screen, back/home/recents buttons are inside the navigation bar.

When system navigation is set to Gesture navigation:

1. When apps are opened, there will be a navigation bar at the bottom of screen.

2. All navigation buttons(back/home/recents), all apps icon and tools are retained in sidebar.

	About BundleBoardI							

When system navigation is set to 3-button navigation:

Navigation bar is always displayed at the bottom of screen, where Back & Home & Recents as long as All apps and Account icon are placed in.

In Bytello OS EDLA verison, Gesture navigation is set as the default navigation.

You can set your preferred system navigation in system settings.

		About BundleBoardI						

Sidebar

Tap the side icon to call up sidebar (The icon will automatically hide if there is no operation within 10 seconds) :

Sidebar contains 3 content areas: navigation (including app access), customizable tools, and fixed tools:

back
 back
 home
 tasks
 apps
 snap
 g board
 ford
 sound
 ford
 inputs
 more

- Navigation: Back, Home, tasks and apps.
- Customizable tools: Snap, Mark and q board
- Fixed tools: Sound, inputs and More.

Tap "All apps" icon to call up All apps menu.

Tap "More" to find more tools and "Audio & Display" menu.

In the "More" menu, tap "Edit" or long press on any tool icon to activate edit mode. In edit mode you can drag to change the order of tools or add up to 4 tools to sidebar.

Adjust brightness and volume by dragging the dot on control bar, tap "Advanced" to enter advanced audio & video settings in Menu.

Mark

Tap "Mark" to execute Mark:

After Mark is excecuted, a toolbar with simple functions will be displayed.

Tap "Select" to switch to touch mode. In touch mode, you will not be able to write. If you have already written on screen, then all the written strokes will be cleared.

Tap "Pen" to enable pen writing, tap "Pen" again to open pen settings page. In pen settings page, you can change pen thickness and color.

Tap "Brush" enable highlight brushing, tap "Brush" again to open brush settings page. In brush settings page, you can change brush thickness and color.

Tap "Clean" to clear all the written strokes.

Tap "Save" to save the annotation as picture.

Tap "More" to open the additional menu, such as Finder, Insert (insert into the Q Board), Share, and Cloud.

Tap "Close" to quit Mark. All unsaved annotations will be lost.

Inputs

Tap "inputs" to execute Menu.

You can switch to any external source of the IFP, and adjust video & audio settings in Menu.

The default page General is for switching sources, adjusting brightness and volume.

The Display page is for changing display settings, including eye protection, picture mode, color temperature and other advanced settings.

• Auto brightness: screen brightness will change automatically according to ambient brightness.

• Energy saving: after 1 minute of continuous low ambient brightness detected, screen will be turned off automatically.

• Eye care: screen will be adjusted to warm color to protect your eyes.

• Paper eye care: screen will be adjusted to warm color and displays a paperlike texture.

• Picture mode: set your preferred picture mode, or you can adjust brightness, contrast, saturation and sharpness by switching picture mode to Custom.

- Color temperature: change color temperature to your preferred status.
- Advanced settings: change advanced picture settings.

• Color space: set your preferred color space, note that display distortion may occur in certain scenarios when color space is not set to sRGB.

• HDMI range: the device connected to IFP via HDMI cable may support different color spaces, if the HDMI display is abnormal, it is suggested to change this setting.

• Pixel shift: screen will shift by certain pixels every certain time, in order to prevent the screen from burning.

• Dynamic contrast: enhance the contrast between light and dark effect for currently displayed picture.

	Color Temperature	0		Dynamic contrast(DCR)	
	Advanced settings	>			

The Audio page is for changing audio settings, including audio mode, volume and audio balance etc.

- Audio mode: change your preferred audio more, the preset audio modes are:
 - Standard
 - Meeting
 - Class
 - Custom

If the audio mode is set to Custom, you will be able to adjust detailed parameters:

- Bass
- Treble
- Balance
- Mute: turn on/off this switch to disable/enable system sound.

Timer

Tap "Timer" to execute Timer.

Set desired time and tap "Start" to excecute the countdown.

When countdown starts, tap "Pause" to pause the countdown, tap "Reset" to reset the timer.

Timer		
00 :	00 :	58
Pause		Reset

When countdown is paused, the "Pause" button will change to "Resume". tap "Resume" to continue the countdown.

Tap "Fullscreen" icon on the upper right corner to enlarge Timer to full screen.

Timer

Tap "Close" icon on the upper right corner to close Timer.

Timer

Freeze

Tap "Freeze" to freeze current screen.

Screen will be instantly frozen when you tap the icon.

When the screen is frozen, you can zoom in or zoom out the frozen picture to see details. You can quickly recover to fullscreen by tapping "Full-screen". tap "Close" to quit freeze mode.

Stopwatch

Tap "Stopwatch" to excecute Stopwatch.

Tap "Start" to start counting. While counting, tap "lap" to record the time for current lap.

Tap "Pause" to pause the counting, when counting is paused, tap "continue" to continue counting or tap "reset" to initialize the stopwatch.

Click "Close" icon on the upper right corner to exit Stopwatch.

Spotlight

Tap "Spotlight" to excecute Spotlight.

When spotlight is excecuted, the screen will focus on a small area. Use two fingers to spread or shrink to adjust the spotlight area, or you can tap "Setting" to adjust the clarity and zoom in/out the spotlight area.

Tap "Exit" to exit spotlight.

Screenlock

Tap "Screenlock" to directy lock the screen.

You will see the lock screen:

Use PIN code to unlock the screen.

Snap

Tap "Snap" to excecute Snap tool.

You can choose to use different types of screenshot: "Freedom" for freely selecting screenshot area, or "Full" for full screenshot.

If you choose freedom screenshot, you can drag the highlighted area to move it or drag the white dots on the edge of the area to adjust it.

After selecting the desired screenshot area, tap "Save" to save the screenshot, or tap "Insert" to insert the screenshot into the Q Board.

Vote

Tap "Vote" to excecute vote.

In vote tool, you can create a virtual classroom, students can join this classroom by scanning QR code with their mobile phones or input connection code on their laptops.

If students join the class via mobile phone, they will see the below picture:

You can enter the class anytime, students can still join the class after you enter the class.

When the class starts, you can choose the activity for students to engage in class:

Voter

Tap "Voter" to start a voting, you can set the voting as single choice or multiple choice.

After students submit the answer from their sides, you will see the members who have voted in real time:

			×
	Single choice	Multiple choice	
Ме			
			user: 1/1
	00	:08	
	Fir	nish	

Tap "Finish" to finish the voting, in the following screen you will be presented the voting result. Choose the correct answer and you can see who has answered your question correctly:

Responder

Start a responder, the "OK" button on the student's screen will become clickable.:

The first student tapping "OK" will get the chance to do the class activity.

×

	Me	
	Be the one	
\bigcirc	Reset	\bigcirc

Selector

Before starting a selector, you can choose the number of students to be selected. Tap "Start" to start randomly selecting students to do the class activity.

Message

Enable Message to allow students to send messages in class. From student side, change the page to "Message" and input the words, tap "Send", the message will be displayed as a floating subtitle on the IFP screen:

Manage

While in the AirClass, you can still manage the members in Manage, in this page you can show the information to join the class to students, just as when you first created the class:

8:42PM 💠 🗳 🖶 🔳	围 538 626	•

Settings Volume - Volume +	Image: Bioware Apps Screen cost Papel Finder	Profile

Record

Tap "Record" to excecute Recording tool.

You can configure recording settings before starting the recording:

Rec	O Settings	Exit
	Settings	5
Video		
Resolution		3840x2160 👻
Save route		
/Storage/R	ecord	
Cance		Confirm

Click "Rec" button to start recording. Before the recording starts, there will be a 3-second countdown for you to do the preparations.

After the recording starts, you can pause or stop the recording from the control bar:

PC

Tap "PC" to directly switch to PC source.

Cast

Tap "Cast" to open screen casting app.

The preloaded screen casting app is Bytello Share.

PIP

Tap "PIP" to open PIP window.

In PIP window, you can switch between different sources and preview their screens.

You can adjust PIP window size, adjust volume of the source or enter the source from the lower right area.

Display Center

Display Center is a feature based on the hardware ability of 3576 platform. It presents you with a space to manage the screens connected to the IFP via HDMI.

Tap "Display Center" to open Display Center.

All sceens connected to the IFP are set as duplicate by default.

In display settings page, you can rename the connected screen and change the screen display mode to Extended.

Display Center	< Display settings
Connect to a secondary display, enjoy interaction with multiple display.	Manager
	Mark the screen disploy the most screen disploy the most screen disploy the most screen disploy the most screen disploy to the disploy t

After changing the screen to extended mode, you can adjust the relative position of the screen by dragging it to different hot zones, this can help you to match the virtual screen positions to real positions.

Layout

Press and hold (or click) the display, then drag to rearrange the position.

After finishing display settings, you can go back to main interface and distribute tasks by dragging it to desired screen, and the task will be sent to that screen.

System settings

Tap "Settings" in all apps drawer or in control center or button menu to enter system settings.

Network & internet

You can check and manage all the network settings in Network & internet.

- Internet: manage your WLAN settings
- Etherner: manage your wired network settings
- Airplane mode: temporarily disable all network connections
- Hotspot & tethering: manage access point settings
- Data Saver: if you are using a metered WLAN or AP, turning on this will help you reduce data usage
- VPN: manage VPN settings

• Share network: If IFP is connected to Ethernet, and your personal device is connected to IFP via HDMI and USB cable, when the IFP is switched to the source of your personal device, your personal device can use the same Ethernet of the IFP.

Private DNS: manage your private DNS configuration

Connected devices

You can check and manage all the device connection settings in Connected devices.

Personalization

In "Personalization" page, you can manage auto backup, preview your personal launcher and turn on/off Multi-Windows mode.

When Auto Backup is ON, all your personalized settings will be synchronized.

All your changes in launcher will be synchronized.

Your preferences of Multi-Window mode will be synchronized.

Security

In "Security" page, you can change your account password.

About

In "About" page, you can check account legal information, manage User Experience Plan, view account user guide or give your feedback about account experience:

Q Board

Tap "Q Board" to enter board:

Basic functions

Note supports below basic functions:

- Write:
 - Various pen settings and support 20 strokes writing simultaneously.
 - Finger & stylus separation *(only available with high-accuracy IR touchframe)*
- Erase: Multiple erasing approaches
 - Eraser
 - Palm erasing
 - Selection erasing
- Select: Select objects and move & edit
- Undo/redo: undo or redo operations in note.
- Page management: add/delete, preview all and switch between pages.
- Canvas customization: select different templates and colors for canvas to meet various needs for teaching.

Pen settings

You can change pen type, pen thickness and pen color.

Note supports 5 pen types:

- Regular pen
- Brush
- Ink brush
- Handwriting pen recognize your handwriting automatically and convert handwriting to text

• Magic pen - recognize your drawing automatically and convert drawing to patterns

You can change pen thickness and pen color for every pen type. Besides preset colors, you can tap the palette icon to select your desired pen color:

3 levels of object thickness recognition (*only available with high-accuracy IR touchframe*)

Support recognizing 3 levels of object thickness in Note:

- Thin pen
- Thick pen
- Finger

For finger side, you can choose whether to handle finger operation as selection or writing by enabling/disabling "Use finger to select" option:

You can set pen style for different sides and write different strokes separately with each side without having to switch between different pens:

Erase

Note supports 3 erasing approaches:

- Eraser select Eraser and start erasing
- Palm erasing swipe with your palm or back of the hand on screen to erase
- Selection erasing switch to Erase selection in Settings, then select Eraser, all the object selected by you will be erased

Selection

Select Selection, and draw lines to select objects. Available operations will differ according to selected objects.

One extra way to select is "Draw circle to select". Enable this option in Settings and draw a closed circle on any object to select it:

Settings	
Eraser mode C Eraser C C C Erase selection	
Palm rejection When enable, ignore the palm resting on the screen	
Multi-finger writing Multi-finger writing is allowed when turned on, and multi-finger is preview when turned off.	
Draw circle to select When enable, element can be selected by drawing a circle.	
Automatic brightness	

Redo/Undo

Note supports unlimited undo/redo operation.

Page management

Tap "Add" to add more pages.

Tap "Previous" or "Next" navigate through pages.

Tap page number area to call up page list. You can preview all pages, switch between pages or delete pages.

Canvas customization

Note supports below 2 kinds of canvas customization:

- Changing template
- Changing background color
- Changing background picture(from color selection page)

List view

Tap "List", and you can view all the note files in a list view. You can switch between different note files from this list.

Tools

Ruler

Tap "Ruler" to open the ruler selection page.

Note supports importing straight, triangle and half-round rulers.

Draw lines by ruler edges to get standard straight lines.

Change the angle on the half-round ruler, and click the "Check" button to get a standard angle.

Shape

Tap "Shape" to open the shape selection page.

Note supports inserting 2D/3D shapes, also supports recognizing hand-drawn shape and standardizing it.

You can tap this icon to activate recognition of hand-drawn shape:

In this mode, you can draw a shape by single pen stroke, Note will automatically recognize your drawn shape and standardize it:

Partition

Tap "Partition" and select desired partition numbers, the canvas will be devided into selected partitions:

Let's take 2 partitions for example.

Different students can write in his & her own partition, Note supports setting different pen colors for each partition. All the written strokes will be kept the same place after exiting partition mode.

Here are how 3 partitions and 4 partitions look like:

Table

Choose the desired number of lines and columns, and tap "Insert" to insert a table:

After table is inserted, you can write in table cells with Pen, table cells will adjust itself to fit your handwriting:

Use Selection to select the table, and you can tap the "add" icon around it to add lines or columns, then you can write again in the added cells:

Mindmap

Mindmap is the perfect tool for collecting your brainstorm ideas in class.

Tap "Mindmap" and an empty mindmap will be inserted instantly:

You can write with Pen in the mindmap nodes, your handwriting will be recognized and you can convert it into text:

After converting, auxiliary icons will show around the node. Tap the "add" icon to add parent or child node, tap "more" to find "delete" icon, and you can delete the node:

You can change the position of a node by dragging it and placing it in a different place:

Sticky notes

Tap "Sticky notes" to start editing a sticky note.

You can record important information by typing words in sticky notes and stick them in canvas:

Sticky notes can be moved freely in canvas:

Preview

Tap "Preview" to open the preview window.

When the canvas is extremely zoomed in, it will become hard to find the contents by dragging the canvas. Use Preview to see the canvas globally and freely navigate to the place you need.

Grid

Tap "Grid" to insert a grid.

Grid helps you to standardize your handwriting and convert handwriting into standard style:

Planet

By tapping Planet, you can set the solar system as the background of current page:

With Selection, you can scroll and zoom in & out the solar system to check the position of each planet, you can also write on the planets with Pen or insert tools.

Formula

Tap formula, you can edit the formula and insert it:

After formula is inserted, you can select it to edit it again.

Search

Tap "Search" to start searching for pictures or video:

Input the theme you want to search for and select the ideal search results and insert them. You can insert multiple pictures at once.

In the same way, you can search for video and insert it. Note supports inserting 1 video at a time. Inserted video can be moved freely in canvas, click "Play" to start playing the video.

Add new note & open note

Tap "New" to create a new note file. Before creating the new file, you can choose to save the current note or discard the changes.

Tap "Open" to find a saved note in Finder and open it.

Save & Save as

Tap "Save" to save the changes to current note.
Tap "Save as" to save the current note as a new note file.

Palette

Palette is a tool for art classes, you can draw with various types of pens & brushes and mix the pen color freely.

Tap "Palette" to open Palette:

Palette supports 7 pen types. Draw with different pens to produce different effects.

Also, you can adjust pen thickness according to your needs.

Change the color you need in ColorBox:

with the first color to get a mixed color:

Select one color and fill it in Palette first, then select the second color and mix

	雨 бкэ үрз		而 бкэ үрз	
1		()		1
				8 0

You can use Fill to fill the new color in any closed drawing:

You can use Sample to take the sample color from the screen for subsequent drawing or filling:

	S 6K3 YO3		S 6K9 YO3		© XXE 096	
)		()		()		I
		2	(m			9 0

Tap the downward arrow to hide the toolbox, in order to get maximum drawing space:

Tap "Clear" to clear the entire canvas, or you can use Undo/Redo to undo or redo your operations:

Tap "Menu" to see general operations.

You can save the palette file, import saved palette file, share the palette via QR code or exit Palette.
