QClick

QRF 700 Audience Response System

What is QClick?

QClick is the most powerful and cost effective Audience Response System on the market. It can be used in traditional classroom settings, group meetings, or wherever instant feedback is desired.

The QRF 700 system lets you engage participants in virtually any situation. QClick software integrates with Microsoft PowerPoint, making it both easy to learn and fun to use. With the QRF 700's all new LCD screen and full alpha-numeric keypad, students can bring their work home and can submit their answers when they walk back into the classroom. With PowerPoint integration, real-time feedback can be electronically collected at the simple click of a button. This eliminates having to hand grade tests and quizzes and allows for a wide variety of reporting features to track the progress of students. The built-in mouse control and teacher remote gives you the freedom of not being tied to the computer. Classrooms are enriched as the QRF 700 encourages interaction and participation from every singe audience member, leaving no one behind.

The Power of the QRF 700

- Full alpha-numeric keypad for text and numeric answers

QClick Software Overview

The QClick software features setting up classes, creating exams, managing communication, and it produces reports. QClick can fully convert PowerPoints into a QClick exam with built-in conversion tools that supports all standard features such as slide transitions, custom animations, multimedia, and audio.

The built in tools for creating exams are easy and fun. You can taillor your quiz however you like or even make games like rish quiz and elimination! The QClick software features many different responses like single answer, multiple answer, short answer, and true/false. After you have your quiz made you can assign it as homework to the response pads to ensure security and instant answer uploading.

QClick provides a full range of reporting and grading features for tracking the progress of an entire class or an individual. Reports are available instantly in easy to read graphs or detailed reports that are compatible with Excel, CSV, Word, HTML, and PDF.
