## 1. Install the receiver

Connect the HDMI to the HDMI IN port of the Interactive Flat Panel. Use an A-to-C power cable to connect the TYPE-C to the USB 2.0 power input of the Interactive Flat Panel, or power it via an independent 5V/1A power adapter.

## 2. Plug and play

Connect the TYPE-C port directly to your smartphone or tablet using a C-to-C cable. Wait a few seconds until the flashing light on transmitter stops, and it will start mirroring automatically.

For devices that do not support DP mode, please connect the HDMI port to the HDMI OUT of the device. Use an A-to-C power cable to connect the TYPE-C port to a USB 2.0 power source, or power it via a standalone 5V/1A power adapter.

## 3. Stop and restart mirroring

Press the mirror / pair button on the transmitter to stop mirroring or restart mirroring.

\*If unable to mirror, please pair your transmitter to the receiver again. Scan the QR code on the back and follow the steps in the full manual.
