

webcam 004

WEB CAMERA
QWC-004

Quick Start Guide

The high definition QOMO WebCam 004 is an essential tool for upgrading your remote learning or WFH (working from home) experience. Clearly record and stream conferences, online teaching, and hangouts. Built with professional quality components, it has a sharp 1080p camera and built-in dual mic to capture all of the details. The QWC-004 is also easy to clip on, swivel adjust, and move around, with a tripod adapter on the base.

This product is CE, FCC, ROHS certified.

LIMITED WARRANTY

Your QOMO webcam includes a warranty guarantee of 1 year from the date of purchase. For more details on warranty coverage, visit www.qomo.com/warranty

For technical or service questions about the products, please e-mail our customer service at support@qomo.com

Q HUE

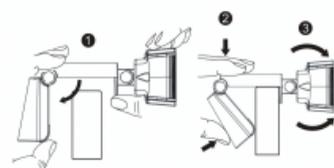

QOMO webcams come equipped with software that allows you to optimize and tune your webcam image. Adjust brightness, saturation, contrast, & more.

For additional tutorial videos and software download, visit www.qomo.com

SETTING UP YOUR WEBCAM

On a monitor

For mounting your webcam to your monitor, open the clampable base on your webcam, and clip it to the desired location on your monitor. Be sure that the foot of the clip base is flush with the back of your monitor.

Using a tripod

With a 6ft cord, the QOMO QWC-004 webcam can also be attached to a tripod for more flexibility with your webcam. Twist the QWC-006 tripod accessory (purchased separately) or a universal tripod into the adapter screws at the bottom of the base clamp.

USING YOUR WEBCAM

Connect to your computer

Plug your webcam into the USB interface of your computer or display device. An LED indicator light will turn on when the camera is plugged in and ready to use. An additional blue light will appear when the camera is in use. The QOMO QWC-004 is plug-and-play, no need to install additional drivers for use.

Swivel head

The QOMO QWC-004 is the most flexible and adjustable webcam, allowing you to swivel your camera head 180°. This allows for recording of the room or multiple speakers easily from one place.

Q HUE image tuning

Download the QOMO Q HUE to adjust the webcam image to your liking. This is an optional tool for using the QWC-004. After making your adjustments, you can save your filter for future use.

CONNECTING VIA WEB CONFERENCE

The QWC-006 can be used with Zoom, Google Meets, Microsoft Teams, Skype, and any other software that supports a camera plug-in.

If the QOMO webcam does not automatically appear, go to camera settings and make sure HD 1080p camera is selected. Additionally, you may select the webcam in audio settings to make use of the dual mics on the QWC-004.

ADDITIONAL

The QOMO QWC-004 can be used with other computer softwares as well, such as Photo Booth or for video recording. To use, select the HD 1080p camera in the camera settings of your software.

To check if your camera is connected without opening a specific software, go to the Settings window of your computer. Search device manager, camera settings, and audio settings to check if your QOMO QWC-006 HD 1080p camera is recognized, and select to use.
